AKNOWLEDGEMENT

Most of all, i want to give thanks to God for His blessing and His guidance which enabled me to complete my industrial training, completing the writing of this report and will entitle me to receive my diploma. I am able to complete this assignment which facilitated the completion on this industrial training report. This Industrial training report would have not been carried successfully without the cooperation from many parties who contributes in preparing and completing this study.

On 6 June 2016, I and two others training partner have started my industrial training at Agriculture Research Station, MPOB Belaga and ended on 11 September 2016. I have learned a lot of things throughout the past 2 months. I would like to give my thanks to the most precious person in my life, which is my parent, En. Gerasi Banat and Mdm. Sandi for their endless moral support and also in term of financial support. To my internship friends, thank you for your suggestion, and ideas throughout the training.

My sincere thanks and gratitude are extended to my dedicated and understanding advisor Sir Muhammad Syukrie Bin Abu Talip, the lecturer of UniversitiTeknologi Mara, for the guidance and assistance, understand and commitment throughout the duration of this work. The encouragement and criticism were helpful in completing this practical report.

I am also deeply indebted with the Station Manager Mr. James Chulla Hollis, Research officer and all staffs at Agriculture Research Station, MPOB Belaga such as Mr. Jeffery Mos, Mr. Augustine, Mr. Affendi, Mr. Albilano, Mr. Edwin, Mr. Abd Rahim, Mdm. Monica Belulok, Mdm. Catherina Peter, Mdm. Lia, Mr. Redza, Mrs. Shirley, Mr. Jackson, Mrs. Raziana for accepting my friends (Susimah& Ester) and I on application industrial training at MPOB Sg.Asap and cooperation in providing materials and information for this practical report.

A special word of appreciation goes to my friends Susimah and Ester as my training partners in giving useful information and comment for me in completing the practical report. During these 3 months working at Agriculture Research Station, MPOB Belaga as a trainee, I am exposed to many new experiences which are very valuable for me to learn and carry out when I face the real world of working in the future. The reason for us as a student doing or having our industrial training is to expose us to the work life before us graduating soon. By doing so, we will know how to adapt and communicate with other people who are on the same field as

INTRODUCTION

Introduction of industrial training

Industrial training is a prerequisite to the award of Diploma students in Planting Industry Management, UniversitiTeknologi Mara. It is also designed to give exposure and experience to the students about the real situation in their respective fields and early preparation for students before they enter the working world. For session from November 2013 to setember 2016, the training runs for 3 months starting 6 June 2016 until 9 setember 2016. We was stationed at MPOB Sg.Asap, Belaga.

Industrial Training Purpose

The main purpose of training is to expose students to a professional environment, combining the knowledge they have learned and apply it to the daily work practices to develop the knowledge, enhancing skills and developing the personality of students.

The importance of Industry Training

Training is a branch of knowledge that provides an opportunity for every student to apply the learning process experienced during a session in the classroom. It can be seen from different perspectives, for example, indirectly it can intensify existing skills found in a student"s own self as well as gain new skills and knowledge in a particular field of work through.

In addition, industry training also reduces nervousness and feeling awkward when students face the real working world will realize the ambitions and dreams while studying. All the solutions of the problems, the industry training will be a maturing experience for yourself. Indirectly. It will bring awareness to the students that the situation in the workplace actually is not as easy as they have learned in theory and practices while learning.

On the other hand, industrial training is important because it makes its easier for students to apply for suitable positions after graduation. This is no doubt because in general the firm emphasizes individuals with high knowledge and work experience. Therefore, its is possible that the company offers a place for formers trainees after graduation.

However, the input obtained from this training is very large. Students can use the experience and skills acquired during the training period as aguide and supply in the future. In addition, the difficulty encountered during this period will be a key enabler and catalyst for students to improve the performance of a high extent and make sure the student become dedicated worker.
