Guided, Dedicated planters for the Making.

ACKNOWLEDGMENT

I would like to express my deepest appreciation to all those who provided me the possibility to complete this report. First of all, I would like to give a big thanks to the Syarikat Ladang DAFA SDN BHD for giving me an offered and opportunity for being part of their company team for 3 month. It has been a great experienced and exposure for me. I have earned more than what I expected.

Secondly, I also want to express my sense of thankful and deep appreciation especially to Faculty of Plantation and Agrotechnology of UiTM Sarawak for giving me the opportunity to undergo the internship program for my final year in studying Diploma in Planting Industry Management. Plus, it also gives me the opportunity to gain and raise the confidence level in order to overcome the real working situation.

Furthermore, a big thanks to my Estate Assistant Manager Encik Mohammad Napolean Abdullah whose contribution in stimulating suggestions and encouragement, helped me to coordinate my project especially in writing this report.

Besides that, not forget to my parents for their endless moral support and also financial support. A special thanks goes to my team mate, who help me to assemble the parts and gave suggestion about the task for guiding me in doing my work task and being such a great friends during my interns. It such a great pleasure to work with them.

I am so grateful and thank to Allah S.W.T for blessing me during my internship program that finally lead to successful in finish my report.

Lastly, I would like to thank to every individual that helped either directly or indirectly in preparing this proposal project especially all the staff at the Dafa estate for sharing the information about how the management in oil palm industry. I am very grateful to have an experienced all the hardships and valuable memories towards a successful internship program's report.

INTRODUCTION OF INDUSTRIAL TRAINING

Industrial training is a medium where the students will be introduced to the real situation in the plantations. Besides it is to give exposure and experience to the students about the real situation in the fields. Hence, this is an early preparation and exposure for students before they start working at any company in future. Industrial training is a prerequisite to the award of Diploma students In Planting Industry Management, Universiti Teknologi Mara. For sessions from September until December 2018, I was doing my industrial training for three months, starting from 3 September 2018 until 9 December 2018.

OBJECTIVE OF INDUSTRIAL TRAINING

The objectives of industrial training are as follow:

1. To expose students to the real working environment and expending the knowledge in their specific field.

   Student will further learn their real life profession. They will learn what they need to do in order to finish their work. Students will easily adapt and fulfill demand of their working environment after they finish their course.

2. Help students to develop their soft skills and experience.

   During industrial training, students are exposed to variety of problems and had to face it. With the experience learnt from industrial training, students will be more confidence in learning and working.

3. To relate theoretical knowledge with application in the working environment.

   Students are only exposed to the basic theory and needed in their field of their own. These theories are mainly from books. During the industrial training, students will experience real life situation in the field. This will make the students use their knowledge to complete their tasks and solve problems.

4. To produce trustworthy workers with high responsibility and able to cooperate with other staffs.

   All tasks given by supervisor must be completed with a sense of trustworthy and full responsibility. This attitude is very important to ensure all tasks given to students can be carried out smoothly. It also train the students to be honest to themselves and others.

5. Learn to interact with superior officer.
