SECTION 4: HERBS AND MEDICINAL PLANTS SECTION	
INTRODUCTION	45-46
GERMPLASM COLLECTIONS	47-54
PLANTING HERBS	55
PLANT PROPAGATION BY STEM CUTTING	56-57
TRANSPLANTING JADAM PLANTS	58

AKNOWLEDGEMENT

First of all, I want to thank our campus, Universiti Teknologi Mara Kampus Mukah 2 for giving me opportunity to have industrial practical at Kabuloh Agriculture Research Station (Stesen Penyelidikan Pertanian Kabuloh).

Next, I would like to thank Kabuloh Agriculture Research Station for allowing me to have industrial practical here, especially to the OIC (Office-In-Charge), Hajah Rosmah Haji Jaffar for her guidance and support for the all three months I had spent here. Thank you very much for teaching me a lot of things that I was having no knowledge about agriculture in direct way or indirect way. I would like to thank the RO (Research Officer), Mr. John Jadol for the help and guidance during my industrial practical at Kabuloh Station.

I am also greatly indebted to the supervisors, PT Lilianita, AA Desmond a/k Rangub, SAA Muriani Harry, SAA Agam a/k Giang, AAO Razaman Ibrahim, AA Sandra Faradilla, SAA Yusli Sawal, PA Burjit Gelanggang and all the staff in every section for the cooperation to provide the materials, suggestion and information to complete this report.

I would like to take this opportunity to express my appreciation and thanks to Mr. Muhamad Syukrie Bin Abu Talip for giving me valuable advices and information about the process to complete my report.

Sincerely, thank you once again.

INTRODUCTION

Kabuloh Agriculture Research Station was originally called Luak Station set up in 1964 as an experimental oil palm station. Kabuloh Station has 34 staffs (1 OIC, 2 RO, 5 AAO, 2 AA, 3 PT, 3 PKB and 18 PA).

It is about 43km from Miri city along the Miri-Bintulu trunk road after the Sarawak Oil Palms Berhad (SOPB) factory, and before a Petronas station, since 1980, it has expanded into a multi-crop field research station for fruit trees, food crops, and commodities like cocoa, coconut and coffee.

Initially, Kabuloh Station has area of about 550Ha but now it left with approximate 200Ha and the remaining of 300Ha utilized by Unit Perikanan Darat, Taman Kekal Pengeluaran Makanan (TKPM), Pertubuhan Peladang Kawasan (PPK) Subis and Pusat Pembangunan Kemahiran Sarawak (PPKS).

In 1990, it developed from an experimental station into a fully integrated agriculture station with facilities for inland fishery, orchard and nursery, herb and medicinal plant nursery, veterinary (livestocks) and commodities like oil palm and rubber trees.

Kabuloh Station major role is for research outside the station like rubber research, paddy research and taro research, transfer of technology, advisory services for farmers and staff to conduct courses.
