PENGAJIAN KEJURUTERAAN AWAM

UNIVERSITI TEKNOLOGI MARA CAWANGAN PULAU PINANG

Message from Ketua Pusat Pengajian

Assalamualaikum Warahmatullahi Wabarakatuh and greetings,

It is a pleasure to welcome you to the 2025 edition of Buletin FKA. This bulletin brings together the activities, achievements and memorable moments of the School of Civil Engineering, UiTM Cawangan Pulau Pinang throughout the year.

Looking back, 2025 has been a meaningful year for our School. While the achievements recorded in this bulletin deserve recognition, I believe our true strength lies in the people behind them. Every programme, student activity, research initiative and community engagement reflects the time and effort contributed by our lecturers, administrative staff, technical staff and students.

As educators, our responsibility extends beyond delivering academic content. We must prepare our students to think carefully, act professionally and respond confidently to the challenges they will encounter as civil engineers. The engineering profession continues to change, and our students must be ready to work with new technologies while remaining attentive to public safety, environmental concerns and the needs of society.

I am particularly grateful for the cooperation shown by everyone throughout the year. Some contributions are clearly visible through awards, publications and successful programmes, while many others take place quietly behind the scenes. Both are equally important to the continued success of our School.

To our students, I encourage you to make full use of every opportunity available during your time at UiTM. Academic knowledge provides the foundation, but your willingness to learn, communicate and take responsibility will shape the kind of engineer you eventually become.

I would also like to thank our alumni, industry partners and collaborators for continuing to share their knowledge and experience with us. Their involvement helps ensure that our teaching and activities remain relevant to professional practice.

Finally, congratulations to the editorial team and everyone who contributed to this edition. I hope Buletin FKA 2025 will serve as a meaningful record of our shared journey and remind us of what we can accomplish when everyone contributes.

Thank you and Wassalam.

Kapt. (PA) Ts. Dr. Muhamad Faizal bin Pakir Mohamed Latiff

CIS DAY 2.0 TIKTOK CHALLENGE

#FunnyFail Challenge: Bila Kreativiti Bertemu Gelak Tawa!

Nur Shafieza Azizan & Noraziyan Abd Aziz

Kalau sebut tentang CIS Day 2.0, pasti ramai yang terus terbayang suasana padang yang meriah, sorakan rumah sukan yang penuh semangat, dan pelbagai aktiviti sukaneka yang mencuit hati. Namun, ada satu kelainan yang benar-benar mencuri perhatian warga fakulti iaitu TikTok Challenge yang bertemakan #FunnyFailChallenge# anjuran Unit Korporat & Multimedia PKA bersama Academic Advisory Unit PKA. Berlangsung dari 10 hingga 15 Januari 2026, challenge ini bukan sekadar pertandingan biasa, tetapi menjadi "highlight moment" sepanjang program CIS Day 2.0. Apa yang menjadikannya unik? Sudah tentu kerana ia memfokuskan kepada detik-detik lucu dan 'fail' spontan yang berlaku sepanjang sukaneka berlangsung. Daripada peserta yang tergelincir secara "dramatic", aksi tersilap langkah, hinggalah reaksi spontan yang tidak dijangka semuanya berjaya dirakam dan dijadikan kandungan TikTok yang sangat menghiburkan. Menariknya, TikTok Challenge ini membuka peluang kepada semua warga PKA untuk menyerlah bukan hanya atlet di padang, tetapi juga mereka di belakang tabir. Siapa sangka, individu yang merakam adan mengedit video boleh menjadi "wira senyap" yang menghasilkan content paling mencuit hati. Secara keseluruhannya, TikTok Challenge ini berjaya membawa satu dimensi baru dalam penganjuran CIS Day 2.0. Ia bukan sahaja menambahkan elemen digital dan kreativiti, malah menjadikan program sukaneka lebih dekat dengan minat generasi masa kini.

Bagi menghargai usaha dan kreativiti para peserta, pihak penganjur telah memilih seorang pemenang hadiah utama iaitu Muhamad Zafrul Haziq bin Mohd Othman yang berjaya menampilkan video paling kreatif, menghiburkan dan memberi impak kepada penonton. Selain itu, lima (5) orang peserta yang terdiri daripada pensyarah dan pelajar turut menerima hadiah saguhati sebagai tanda penghargaan atas penyertaan dan idea-idea menarik sepanjang challenge ini. Hadiah telah disampaikan oleh Ketua Pusat Pengajian Kejuruteraan Awam, Ts. Dr. Muhamad Faizal bin Pakir Mohamed Latiff. Turut sama hadir meraikan para pemenang Adalah Ketua Unit Korporat & Multimedia PKA, Puan Nur Shafieza Azizan dan Ketua Academic Advisory Unit PKA, Ir. Ts. Noraziyan binti Abd Aziz.
