In the modern era, businesses have developed a complex relationship with the society surrounding them. While the effects of business activity are clearly seen, their direct impact varies from country to country. Comparative Perspectives on Global Corporate Social Responsibility.

Abstract
The emergence of social enterprises over the past 35 years has been an exciting and significant development in the economy at a local, national and international level. How should we understand the growing popularity of social enterprise and the wider.

Abstract
This paper presents a theoretical framework that explains the virtuous loop of corporate social responsibility and corporate financial performance. The virtuous loop consists of a forward relationship with corporate social responsibility as the predictor.

This is the first substantial book written from first-hand experience by a British planning practitioner, about what the planning process is actually like in a major British city. The city in this case is Manchester, for which authority Ted Kitchen worked.

The urban century manifests itself at the peripheries. While the massive wave of present urbanization is often referred to as an 'urban revolution', most of this startling urban growth worldwide is happening at the margins of cities. This book is about.

It is well known that the world is transitioning to an irrevocable urban future whose epicentre has moved into the cities of Asia and Africa. What is less clear is how this will be managed and deployed as a multi-polar world system is being born.
