1.0 INTRODUCTION

Cini is a newly developed territory in Pahang. The project is developed by an agency called DARA. Before Cini was developed, it was covered by huge jungle. It has an area of 16195.92 hectare of land. Where 931.03 hectare is agricultural area and 305 hectare is mining area. Cini is divided into six (6) small scheme which are:

Scheme	Area (hectare)
Felda Cini 1	1910.54
Felda Cini 2	2375.51
Felda Cini 3	2576.61
Felda Cini 4	2081.13
Felda Cini 5	1851.17
Felda Cini Timur	5400.96

Among these schemes, Felda Cini 1 and Felda Cini Timur are the centre for any activities. DARA has developed these two schemes into administrative centre in Cini, where facilities such as government office, shops and others can be found here.

Felda Cini 1 is the link between the other schemes and the other areas/towns (eg: Kuantan and Pekan). For instance, the distance between Felda Cini 1 and Kuantan is around 86 kms and to Pekan is 64 km. Therefore, Felda Cini 1 is a centralised scheme for any activities or communication in Cini.
