ABSTRACT

The purpose of this study is to investigate teachers' attitudes towards the usage of computers and information technology in education. The aim of this study is to find out whether school teachers are anxious about computers and information technology. This study also aims to investigate the relationship between availability of personal computers, course attendance and computer anxiety and also to investigate the relationship between availability of personal computers, course attendance and the usage of computers and information technology in the classroom. The subjects of this study are 50 school teachers in Sekolah Menengah Kuala Krai, Kelantan, of whom 17 were male and 33 female. The data were analyzed using descriptive statistics. The results of this study revealed that more than 50 percent of school teachers have a positive attitude towards computers and information technology in the education process. The other significant finding of this study is that many teachers, despite their positive attitude, do not prefer to use technology and computers in the classroom. Over half of the respondents, 56 percent, believe that without a computer in the classroom their teaching is still effective. Furthermore, 28 percent of the respondents also believe that computers should be used for certain subjects only. The results suggest that in general, factors like the availability of personal computers and attending courses do not affect teachers' attitudes. The respondents do not, for example, believe that computers threaten the relationship between teachers and students and they believe that computers and technology help slow learners. Based on the findings, several implications and recommendations are discussed.

ACKNOWLEDGEMENT

First and foremost I would like to express my gratitude to Allah s.w.t. THE MOST MERCIFUL AND COMPASSIONATE for His blessing, for giving me strength to finish my study, to be able to complete this thesis and for all He has given me.

Special thanks to my supervisor Dr. Richard Holmes for his guidance, advice and help in assisting me to write this thesis. I really appreciate his time and perseverance.

Not forgetting Associate Prof. Dr. Habibah Ashaari, Prof. Dr. Hazadiah Mohd Dahan, Prof Dr. Zubaidaa Alsree, Prof Madya Dr. Abu Bakar Hj Ibrahim & Dr. Hussein Mahmood. Thank you for all the knowledge you give me.

Special thanks to my wonderful family, especially to my parents Wan Jaafar Wan Mamat and Khalijah Ismail, for their trust in whatever I do. Also to my sister Wan Zariah and her family, to my lovely brother, Wan Saiful Khafizan, to all my nieces and nephews and also to my late sister Wan Zaharah who always has a special place in my heart.

To the one who is always by my side to assist me in completing this thesis, who always listen to my grievances and who always shares my sorrow and happiness. Without you, Ain I do not think I am able to be alone in this long journey.

Thank you to my great friends Suriani Hassan, Roshayani Yahya, Hartini Hassan and Zuraifah Zaini. Thank you to Fatma Hassan for helping me in distributing the questionnaires and also for the information you gave me.

Lastly to my classmates (Pioneer Batch M.Ed TESL), thank you for sharing the knowledge and may this memory last forever.
