Knowledge Is Wisdom

This project consumed huge amount of work, research and dedication. Still, implementation would not have been possible if we did not have a support of many individuals and organizations. Therefore I would like to extend my sincere gratitude to all of them.

First and foremost, I would like to thanks to Allah, for giving me the strength to complete this publication project. This magazine will not be able to be complete without the blessing that has been given by Allah to us.

We are also grateful to Encik Azmi Bin Ab Rahman for provision of expertise, technical support and providing necessary guidance concerning projects implementation. Without his superior knowledge and experience, the project wouldn’t be able to complete on time.

Next, I would like to express our sincere thanks towards some of the lecturers who devoted their time and knowledge in the process of making and providing us with their article.

Nevertheless, I would like to express my gratitude towards my colleagues for their kind co-operation and encouragement which working together as one team in the completion of this project. Without them, I believe that this project will not succeed as it was shown today.

Thank you.

According to Allport, G. (1961) said what is information professional? An Information professional is person who systematically uses information to do his / her task to advance the mission of the organization. Information professional accomplishes this through the development, deployment and management of information resources and services. In addition, the information professional harnesses technology as a critical tool to accomplish goals. Information Professional's not limited to knowledge managers, chief information officers, information brokers, consultants and others. Information professional can be librarian, archivist and web system developers. Universities around the world has offered course in Library and Information Science in academic degrees. In Malaysia, there are few universities such as University of Selangor (Unisel), International Islamic University Malaysia (IIUM), and Universiti Teknologi Mara (UiTM) which has offered this course and can les students to become an information professional. It related in few subjects such as library studies, archival studies, information systems, information management and record management. The discussion below shows some career guidance for those students who take Information Management as their course studies.

In UiTM, Information Management is the official name for this course which seated by diploma students. In diploma, the students will learn new things and not related at all on what they have learn in school. They will not meet biology, physic, chemistry and mathematics. Even though it does not relate to those subject this course still this course has their own benefits and enjoyable. All students who come from different academic background will start everything from scratch and they will learn about library, information communication technology, information agencies, archive, records center. Other than that, in diploma level UiTM has decided to implement many skills including communication skill, public speaking, adobe family skill (Adobe InDesign, Adobe Photoshop & Adobe Illustrator), newsletter, web designing, leadership skill and others. These skills will help themselves and communities out there in the future as example students who have knowledge in designing web? Can share the information through website and by having communication skill, it will help them be brave to face the public and inform public about information. After finish the diploma, students can choose to further their studies in 4 options of information management study which includes Bachelor of Information Science (HONS.) Library Management, Bachelor of Information Science (HONS.) Resource Management, Bachelor of Information Science (HONS.) Records Management and of Information Science (HONS.) System Management. The discussion below discuss about career guidance of the information science field.

Bachelor of Information Science (HONS.) Library Management and Bachelor of Information Science (HONS.) Resource Center Management are quite similar
but the resource center management are more focusing into school library while library management are more focusing into operation in library. Specifically, these two programs focus on the management of academic resource center and library. Other than that, library and resource center giving the knowledge and help to ensure the individual skill in availing the service. So, it is maintained by all educational institutes and public bodies but they have meet some problem regarding to organize systematically and provide quick service with numerous books. The degree holder in library science and resource center management play a vital role to the library because they are trained to handle all type of book and other object stored in library. Library is a place where people find sources better than they expected most probably because of their experience during joint courses, lecturer experience and practical training of the archives. Then, can become a record manager that must be responsible to make of improving their awareness regarding the importance value of record appraisal, preservation, disposal and other careers relative to them.

Besides that, information professionalism can be improve by introducing some flexibility into the curriculum that involve Information Management programmers in record management to enable students who want to subset of records selected for permanent preservation. Normally, the expert in record are responsible to managed the records it will have an expertise people and there is a lot of knowledge to managing the records wisely because it is for evidence for the organization or private. Record management will also provide spark awareness of the responsibility of identify and preserve the culture and history of a people. However, archivists are important and have the authority to make decision to portray because archivists are the professionals best educated to make the decision. For example, archivists are more concerned with government and country to help people of democracy. Then, it is one of the strategies to increase the career guidance in information professionalism of graduate student's perceptions is about in making their communities aware of archivist as a career and as a contribution for their country.

Furthermore, the career guidance in information professionalism is in the field of record management. Records is define as any documents created, received, maintained and used by individual or organization that act as evidence for the purpose of legal obligation or in the business transaction. In records management, the perceptions of academic course will gradually change as they experience the study in lectures and through their program of study. For example, library students showed more capabilities in their field compared to the other course in Information Management such as resource center, record and system. Other example is archives students performed better than they expected most probably because of their experience during joint courses, lecturer experience and practical training of the archives. Then, can become a record manager that must be responsible to make of improving their awareness regarding the importance value of record appraisal, preservation, disposal and other careers relative to them.

Those students who want to be one of the above career options should select optional paper of library science. Normally, after they have finished their practical and get the academic qualification has a big chance in order to show their abilities, opportunities and natural talent in library science field. To become an information professional, there are few criteria that must be followed by all students. It is included the multi tasking skill, a good manner, give full commitment consistently, know other languages, aware about current issues and others. Some of students who have finish their studies in library science wondering about to going out from library field and it will not be a problem because students who studied library science does not necessarily focusing in library. There are many more job opportunities such as a web designer, lecturer, television host and others. These kinds of professions are also relate to library science field because there are subjects that taught to other career too. But students need
In addition, system management is part of information professional. Information system management is important in order to ensure your jobs are offering centralized source of learning whereas training and performance in same source at all time and system also allowing users to evaluate their performance based on periodically scheduling task.

In conclusion, there are many benefits people can get through learning in library management, record management and system management. In library, people can search for various knowledge in a library easily. Either system and library or system and record, they connected with each other because without one of the element, the process will not come out with good result. System management makes easily to using for new users can find out everything they need effective and efficiently. The system facilitated various features including documentation and administration, tracking records or data, renewal and borrowing materials in library, and many more.

smoothly. Normally, in organization, system management is the purpose of information technology to sustain the major functions and activities either for public institution or private business. System also support the process of an organization's information resources without good system management, user will be facing variety of problems because our life and task are virtually connected by information system. People always assume that handling a system is easy as spelling abc and assume that a programmer who cannot control system is useless and cannot achieve goals for the organization it is an inappropriate act because people have to think rationally. In reality, all programmers have already put all their effort to make the system work efficiently and effectively people also perceive that by becoming programmer will turn them into an anti-social person. Nowadays, many public institutions and private institutions offering variety courses regarding information communication and technology (ICT) because ICT careers in information system has a very bright future when they come out with many ideas on innovation of system through their skills in the field. System
That happy look when I reach out my hand from a moving car,
The winds are being loyal to accept the handshake,
All I can think of is myself who never get tired of being me,
All I can think of are my beloved people who reach for me when I am down,
Why pleading for others when you have hearts to be taken care of?
Why being sorry for those who are responsible for your broken heart?
Such a waste of clock ticking when you ignore the smiling faces and longing for those crying nights,
The moon is smiling at you, The sun is shining for you,
Welcoming the good vibe and let the frown and hatred go,
And you will become the happiest person standing on this world,
Anticipating for tomorrow and have pride on the yesterday,
Wake up for a new thrill and brace yourself for the unforeseen hurdles,
Embrace the day, Live your life to the fullest,
and you will forget what your worries are all about,
you will never regret the day,
Gratefulness also positivity keeps you alive,
And that’s what makes you radiant and sunny towards every bits of your journey.
Lelah belajar katanya, 
jemu menelaah rungutnya, 
dunia penuh kebodohan dan kepuraan, 
yang jahil membidas tanpa sekat, yang 
biajak berdiam tanpa kata. 

Tuntutlah ilmu sampai ke liang lahad, 
bertatihlah mengutip permata pengetahuan, 
Dunia perlukan bijak pandai, 
perlukan minda bernas, 
hauskan suara tegas. 

Wajah Bonda Abah berlegar di benak, 
hadiahkan mereka tangisan syukur, 
syukur melihat cahaya hatinya menjadi manusia berjaya, 
yang tahu beza yang jelek dan yang cantik, 
yang berbuah hasil dan yang sia-sia, 
yang membina dan yang merosakkan. 
Pimpin bangsa membina empayar, bantu agama mendidik bangsa, 
Informasi adalah segalanya, 
yang menerima tanpa soal membunuh, 
yang teliti mengkaji terselamat, 
indahnya bila ilmu tersemat. 

Melangkah kaki di gedung ilmu, 
kitab beratus warna, berjuta bentuk, tak terbatas pengetahuan, 

Librarians wield unfathomable power, bring order to chaos, wisdom and culture to the masses, preserve every aspect of human knowledge.
Pantun Ilmu

Mekar sejambak bunga gubahan,
Jatuh sekuntum di atas peti,
Membaca itu suruhan Tuhun,
Al-alaq diturun menjadi bukti.

Cerana kesumba indah melati,
Cantik tersemat dambaan puteri,
Ilmu ditimba sepenuh hati,
Kekuatan umat minda bestari.

Harum sungguh bunga kemboja,
Bunga karangan cantik tersemat,
Janganlah membaca kulit sahaja,
Telitilah kandungan sehingga tamat.

Mekar angsana pandang tak jemu,
Bunganya luruh ke dalam raga,
Buku laksana lautan ilmu,
Dasarnya penuh mutiara berharga.

Daun nipah kajangnya rapat,
Hidangan tetamu di Kuala Maran,
Buku menyimpan berjuta maklumat,
Fakta, ilmu, cereka hiburan.

By M Hadi

In seeking Knowledge
the first step is
SILENCE
the second;
LISTENING
the third,
REMEMBERING
the fourth,
PRACTICING
the fifth,
TEACHING OTHERS...

Ibn Gabiroi

Our life is like a thorny rose,
Not perfect, but always beautiful...
Tudung mestilah labuh, menutup dada, tidak jarang dan tidak terlampau menarik perhatian orang.

Baju mestilah labuh, tidak jarang, longgar, tidak menampakkan bentuk badan dan tidak menggunakan warna yang terlalu terang.

Perhiasan tidak boleh sehingga tabarruj, jangan kelihatan begitu terserlah dan bukan niat untuk tarik perhatian orang.

Kaki adalah aurat yang wajib ditutup. Pakai sarung kaki. Tidak boleh memakai gelang kaki yang berbunyi.
No matter how old
I can’t stop my will
Nevertheless, I will always look for it
As it are uniquely portable magic

The feeling is still there
The vibe is feeling strong
And there is only one word
Yes, I sure about it. Definitely!
Love

Crazy, often
Emptiness was never
Because the bond will never be broke
And the love will never get lost

It had wash away the soul
From the dust of everyday life
Makes me never give up, for the loved ones
And it was all for a book..
Perpustakaan Tercinta Ini
Pelabuhan Kebudayaan Peradaban Zaman
Gedung Akal Laut Bicara Manis Manusia

Mutiara Pendeta Tasik Pujangga
Kota Kebenaran Penaung Kebebasan Ucap Suara
Dari Ruang Ini bersinar Keagungan Pemikiran
Menghayati Teluk Liku Zaman Demi Zaman
Tanpa Prasangka Apa Tanpa Batas Benua

Kekal Bersama Angin Yang Mengusapi
Abadi Bersama Langit Yang Memayungi
Dikeramatkan Untuk Anda Menghirup Di Perpustakaan Tercinta Ini

Tiba-tiba saya teringat lagu si labu terjun dengan labu-labunnya, biarkan...biarkan.
Mengapa dibiaran? Saya juga masih teringat kepada puisi Sasterawan Negara Usman Awang yang berjudul "Melayunya".

Melayu itu orang yang bijaksana
Nakalnya bersulam jenaka
Budi bahasanya tidak terkira
Kurang ajarnya tetap santun.

Melayunya aku

Memang mudah tuding jari kepada DAP
Memang senang tuduh MCA atau MIC
Betul Ke Cina dan India yang menyebabkan
Melayu mundur?
Melayu alpa
Melayu merempit
Melayu ambil dadah
Melayu gila hiburan
Melayu asyik berkonsert
Di dewan-konsert, di padang-konsert, di stadium konsert.
Hebat Melayu, dari Bintang Kecil ke Bintang Tua!
Angkara Cina dan India kah semua itu?

Memang banyak cerita Cina diskriminasi Melayu di dunia pekerjaan.
Dalam sektor swasta mereka kuasai.
Sukar anak Melayu naik pangkat.
Dunia naik pangkat mereka control.
Payah peniaga Melayu nak mencelah sama.
Kita tidak kata Cina dan India 100% tidak bersalah.
Tetapi Melayu juga ada diskriminasi Cina dan India!!

Kita berkata, dimana Melayu boleh kawal kenapa
Melayu tidak kawal.
Kenapa Melayu tak kawal hiburan hingga
melekakan remaja Melayu
Hingga kini bukan saja remaja Melayu,
Mak bapak Melayu pun asyik dengan hiburan.
Barangkali tok dan wan Melayu juga!
Bukan saja anak kecil, datuk dan nenek Melayu
pun menyanyi.
Pun bergencok
Jadi kalau ramai pelajar Melayu tak tau solat. Kalau lagi ramai yang tak tau solat tak tak bersolat la.
Terlalu ramai tak pernah jemaah di masjid Salah Cina dan India lagi!!!
Siapa perintah Negara setakat ini… Cina dan India?
Siapa kesemua PM setakat ini… Cina dan India?
Siapa majoriti ketua-ketua jabatan setakat ini Cina dan India?
Sekarang ini mari kita pakat memperbaiki diri kita.
Perbaiki bangsa kita.
Perbaiki amalan agama kita.
Perbaiki anak muda kita.
Perbaiki pelajar kita.
Dengan menoleh ke dalam diri kita
Dengan muhasabah kesilapan kita.
Dengan ikhlas dengan kekurangan kita.
Dengan usaha perhebatkan bangsa kita.
Hanya Melayu yang Islam boleh maju kedepan.
Melayu yang Melayu sukar, lambat dan tak nampak jalan!
Lihat dalam Islam…
Kita diajak hanya 15 kali sehari, 450 kali sebulan,
5400 kali setahun.
Kan berkemundang “Haiyya alal Falah”
Dua kali dalam azan, sekali dalam iqamah…
5 kali sehari.
Mari Berjaya.
Come to success.
Tetapi “Hanyya Alal Falah: didahului dengan “Hanyya Alal Solah”
Maksudnya Berjaya mengikut acuan Islam.
Mari bersolat, mari Berjaya.
Come to solat, come to success.

Rumusan
Renung bangsa sendiri
Tengok amalan agama bangsa sendiri.
Teliti kesilapan kealpaan bangsa sendiri.
Apabila kita asyik tuduh Cina dan India.
Kita tambah dengan Kedazan dan Iban.
Kita Melayu, kita Muslim lupa perbaiki diri kita.
Itu salah kita selama ini.
Usah beralasan lagi.
Mari kita sama-sama cari jalan keluar.
Ayuh Melayu… sama-sama fikir, sama-sama renung.
Sama-sama bertindak dengan bijaksana.
Bukan emosi tak tentu hala!..
Terima kasih.
