ACKNOWLEDGEMENT

In The Name Of Allah, The Most Gracious and The Most Merciful. I am grateful to Allah S.W.T for giving the opportunity to complete my final year project. With the cooperation of many parties, this project was successfully carried out on time. First and foremost, million thanks and sincere appreciation to my supervisor, Encik Kamarul Ariffin bin Abdul Basit in giving me many valuable information and guidance, also constructive criticism from the beginning until the completion of this project.

Next, my million thanks to Dr. Norlaila for her advice and guidance to write this report and helps organize the contents of this report. I also would like to thanks Encik Azwa Abdul Aziz and Encik Mohd Rasidi Sareh in giving me all the guidance and knowledge in preparing a good project.

Lastly, I would like to thank all my friends (Nurul Najihah, Nasron, Joes Rizal, Mohd Rizuan(pksu), Sharifah Aini(kak eni) ) Encik Naha, Puan Najmi, Encik Zainudin and family and my parents for their encouragement, knowledge and guidance in assisting me during this project development. Thanks for all on your support and May Allah bless upon us.

ABSTRACT

DEVELOPMENT OF BUGS REPORTING SYSTEM FOR HOME PRICING

Data and information in an organization are the most essential components which needed to manage properly to ensure for the stability of the work process in the management environment. These components can help to increase the organization effectiveness and reliability in data processing. This project is been implement for Nisasol Sdn.Bhd company under Administration Department which located at Damansara Utama Petaling Jaya. This company had developed a system called Home Pricing and use the manual reporting to report bugs or error in this system. A new computerised system called Bugs Reporting System was developed to replace the manual reporting process. The main objective of implementing this system is to automate the processes of sending report by the users and receiving it by the system administrator. It is also helps the system administrator to maintain the report log and for references in the future. For the user, reporting the bugs and error become easily and the responds process will be faster than the manual system. This project was developed by using an open source tools, which include the Apache web server, PHP scripting language and the MySQL relational database management system.
