ACKNOWLEDGEMENT

First and foremost, we would like to express our sincere appreciation to Allah S.W.T for giving us strength and patience to complete our research for this final semester which is “A Study on Factors of Job Turnover Intention”.

We are as ever, especially indebted to our parents for their love and support throughout our life. This research could not be complete on time without their help. We would also like to express our heartfelt thanks to our siblings for their sacrifice, support and tolerance throughout our studies. Besides that, we are so glad to thanks to our advisor, Sir Helmy Fadlisham Abu Hassan for his support, encouragement, advice and his understanding during completing this research work.

Besides that, we would like to thanks to all employees at PUTRA Specialist Hospital because of their support and cooperation during doing this research especially to Human Resource Department for their interest, participant and cooperation in completing this research.

Last but not least, we would like to convey our appreciation to all our friends who had supported throughout our studies. We want to thank them for all their help, support, concern and unforgettable memories. Thank you.

ABSTRACT

PUTRA Specialist Hospital is one of private hospital that located nearest town of Malacca. Even though PUTRA Specialist Hospital has more than 600 members in the company but there were still occurred turnover even not in critical phase. Therefore, PUTRA Specialist Hospital should aware have the factors of retention in order to attract and retain their employees in the organization. In this research, the aim is to study the factors that might lead to job turnover intention that happens in almost every organization sector and organization struggling to manage this issue in order to maintain their company's performance. This study involves three major factors lead to job turnover intentions which are job stressor, working environment and also work overloads. For the analysis of the study a total of 234 employees will be chosen from different department at PUTRA Specialist Hospital.

In order to indicate the result, five type of data analysis will be used and conduct for this research which are Reliability Analysis, Frequency Analysis, Descriptive Statistic Analysis, Pearson Correlation Analysis and Multiple Regression Analysis. Reliability Analysis is been conducted to test he reliability of the questions in questionnaire whether is acceptable or problematic. Frequency Analysis been used to analyze demographic data which is on Section A in questionnaire. Meanwhile, Descriptive Statistics Analysis to look on the mean, mode and median of the questions comprised in questionnaire. Pearson Correlation Analysis is to analyze the relationship between variables and follows rules of thumb of correlation coefficient size. In Multiple Regression Analysis, researcher will look on significant relationship between variables the most influential towards dependent variable. Researcher also gives some recommendation based on the result of findings in order to improve for future research. Overall, organization should create attractive environment to help their employees to work more efficient and turnover intention can be reduce.

TABLE OF CONTENTS

CHAPTER 1: INTRODUCTION

1.0 INTRODUCTION	1
1.1 BACKGROUND OF THE STUDY	1
1.2 PROBLEM STATEMENT	3
1.3 RESEARCH QUESTION	3
1.4 RESEARCH OBJECTIVES	4
1.5 SCOPE OF THE STUDY	4
1.6 DEFINITION OF TERMS	4
1.6.1 Turnover Intentions	4
1.6.2 Job Stressor	5
1.6.3 Work Overload	5
1.6.4 Work Environment	5
1.7 CONTRIBUTION OF STUDY	5
1.8 CONCLUSION	6

CHAPTER 2: LITERATURE REVIEW

2.0 INTRODUCTION	7
2.1 TURNOVER INTENTION	7
2.2 JOB STRESSOR	8
2.3 WORK OVERLOAD	8
2.4 WORK ENVIRONMENT	9
2.5 THEORETICAL FRAMEWORK	10
2.6 HYPOTHESIS	11
2.7 CONCLUSION	11

CHAPTER 3: RESEARCH METHODOLOGY

3.0 INTRODUCTION	12
3.1 RESEARCH DESIGN	12
3.2 POPULATION	12

3.3 SAMPLING DESIGN	13
3.4 DATA COLLECTION METHOD	13
3.4.1 Questionnaire Structured	13
3.5 DATA ANALYSIS	14
3.5.1 Frequency Analysis	14
3.5.2 Descriptive Statistic Analysis	14
3.5.3 Reliability Analysis	14
3.5.4 Pearson Correlation Analysis	14
3.5.5 Multiple Regression Analysis	15
3.6 CONCLUSION	15
CHAPTER 4: FINDINGS AND ANALYSIS	
4.1 INTRODUCTION	16
4.2 RELIABILITY ANALYSIS	16
4.3 FREQUENCY ANALYSIS	18
4.3.1 Age	18
4.3.2 Gender	18
4.3.3 Status	19
4.3.4 Income	19
4.3.5 Employment	20
4.3.6 Duration	21
4.3.7 Education	21
4.4 DESCRIPTIVE STATISTICAL RESULTS	22
4.5 PEARSON CORRELATION ANALYSIS	25
4.6 MULTIPLE REGRESSION ANALYSIS	27
4.7 CONCLUSION	28
CHAPTER 5: DISCUSSION AND RECOMMENDATION	
5.1 INTRODUCTION	29
5.2 DISCUSSION	29
5.3 LIMITATION OF THE STUDY	30
5.4 RECOMMENDATION	31
