Acknowledgement

First and foremost, in the name of ALLAH SWT, the most gracious and merciful, thank you for giving us such strength and patience throughout the research.

We would like to express our gratitude and thankfulness to Madam Melinda, our supervisor for her sincere guidance and hard works in the way of the research completeness as well as for her opinions and views she proposed such giving us the idea from various draft stages of reports and assistance in providing us the structure of the work.

To all our classmates, BAS 6A and friends, thank you so much for your aids and guidance throughout the progress of doing the research. We appreciate and recognize all the cooperations and supports. Last but not least, special thanks to our family particularly our parents Dewi Rosnah bt Radin Suhadi and Jusrina bt Abd Rahman for their moral support, encouragement and their understanding as well for us to fully complete the research successfully.

Thank you and thousand appreciations.

Wassalam

ABSTRACT

This study examines the determinants of students' English proficiency of Bachelor Administrative Science of Universiti Teknologi MARA Kampus Bandaraya Melaka. The purpose of the study is to investigate the connection between family background and students' English proficiency, to determine the relationship of environments and students' English proficiency, to examine the connection between students' perceptions towards English language with their English proficiency and to study the relationship of self motivation and students' English proficiency. Previous studies were used as guidelines to determine what factors to be tested in this study. This study helps the researchers to determine the determinants of students' English proficiency among universities students in order to improve the students' level of English. For this study, the researchers used Simple Random Sampling as a method of distributing questionnaires. A questionnaire survey was distributed to 110 respondents among students of Bachelor Administrative Science of Universiti Teknologi MARA Kampus Bandaraya Melaka based on their respective semester. A total of 110 valid responses were obtained. Pilot test, reliability test, normality test, correlation test and demographic test has been used in order to run this study. Based on the study, there is no relationship between the determinants of English proficiency with students' English proficiency.
