Programme: Master of Education (TESL)
Faculty: Education
Dissertation Title: Language Anxiety among University Students: Causal Factors and Coping Strategies

Signature of Student: ...........................................
Date: February 2015
ABSTRACT

The purpose of this study was to investigate the level of English language anxiety among university students, the specific English language skills that cause the greater amount of language anxiety for university students, the possible factors that contribute to English language anxiety from the perspective of university students and the coping strategies to cope and alleviate English language anxiety from the perspective of highly anxious university students. This study employed a survey design with a mixed-method approach. A total of 125 Malaysian ESL university students from non-English majors of different semesters participated in this study and completed two survey questionnaires for the data collection. A Demographic Background Questionnaire was used in order to obtain demographic information about the participants' background. A self-developed questionnaire, the Factors of Language Anxiety Questionnaire (FLAQ) was used in order to assess the participants' self-perceived anxiety levels, the specific skills that caused them greater anxiety and the main factors that contribute to their language anxiety in an English language classroom. Eight university students were chosen based on their high score on FLAQ to participate in eight standardized email interview sessions. The results of this study demonstrated that: (1) the majority of university students had a moderate level of self-perceived level of anxiety in an English language classroom; (2) writing skill is identified as the most anxiety-provoking skill among university students; (3) instructor-students interaction is considered as the main factor that contribute to language anxiety among university students; and (4) the highly anxious students employed the coping strategies such as utilizing language learning strategies, relaxation and preparation. The conduct of this study can provide pedagogical implications for the instructors in giving them the awareness of language anxiety and in creating an anxiety-reduced English language classroom.
ABSTRAK

Tujuan kajian ini adalah untuk mengkaji tahap kebimbangan terhadap Bahasa Inggeris di kalangan pelajar universiti, kemahiran Bahasa Inggeris tertentu yang menyebabkan tahap kebimbangan bahasa yang tinggi bagi pelajar – pelajar universiti, faktor-faktor yang mungkin menyumbang kepada kebimbangan Bahasa Inggeris dari perspektif pelajar-pelajar universiti dan strategi untuk menangani dan mengurangkan kebimbangan terhadap Bahasa Inggeris dari perspektif pelajar universiti yang mempunyai tahap kebimbangan terhadap Bahasa Inggeris yang tinggi. Kajian ini menggunakan reka bentuk survei dengan pendekatan kaedah bercampur. Seramai 125 pelajar universiti Malaysia yang terdiri daripada jurusan bukan Bahasa Inggeris daripada semester yang berbeza mengambil bahagian dalam kajian ini dan pelajar-pelajar tersebut menyelesaikan dua soal selidik kajian untuk pengumpulan data. Borang soal selidik Latar Belakang Demografi telah digunakan untuk mendapatkan maklumat demografi tentang latar belakang peserta. Satu soal selidik yang direka sendiri iaitu Factors of Language Anxiety Questionnaire (FLAQ) telah digunakan untuk menilai tahap kebimbangan melalui penilaian kendiri peserta, kemahiran Bahasa Inggeris tertentu yang menyebabkan mereka mempunyai tahap kebimbangan yang lebih tinggi serta faktor-faktor utama yang menyumbang kepada tahap kebimbangan bahasa mereka ketika berada di dalam kelas bahasa Inggeris. Lapan pelajar universiti telah dipilih berdasarkan skor mereka yang tinggi dalam FLAQ untuk mengambil bahagian dalam lapan sesi temubual e-mel secara seragam. Hasil kajian ini menunjukkan bahawa: (1) kebanyakan pelajar universiti mempunyai tahap kebimbangan bahasa melalui penilaian kendiri yang sederhana dalam kelas bahasa Inggeris; (2) kemahiran bertulis adalah dikenalpasti sebagai kemahiran yang menyebabkan provokasi terhadap kebimbangan bahasa di kalangan pelajar universiti; (3) interaksi pengajar - pelajar dianggap sebagai faktor utama yang menyumbang kepada kebimbangan bahasa di kalangan pelajar universiti; dan (4) pelajar yang mempunyai tahap kebimbangan bahasa yang tinggi menggunakan strategi menangani kebimbangan bahasa seperti menggunakan strategi pembelajaran bahasa, bersantai dan persediaan. Pengendalian kajian ini boleh memberi implikasi pedagogi bagi pengajar dalam memberikan mereka kesedaran mengenai kebimbangan bahasa dan dalam mewujudkan kelas bahasa Inggeris yang mengurangkan tahap kebimbangan bahasa di kalangan pelajar.
ACKNOWLEDGEMENT

Firstly, I wish to express my gratitude to the Almighty for giving me the opportunity to embark on my Master’s study and for completing one year and half challenging journey successfully. My gratitude and thanks go to my supervisor Assoc. Prof. Dr. Nabilah Abdullah. Thank you for the support, patience and ideas in assisting me with this project. I also would like to express my gratitude to my other lecturers throughout the Master’s Programme for providing the input, knowledge and assistance upon completing this dissertation.

My appreciation also goes to the students and lecturers of MARA University of Technology (UiTM) who provided the cooperation during sampling. Heartiest thanks to my course mates and friends for helping me with this project, sticking with me through thick and thin. Only all of you understand how I feel since you also undergo the same situation like I do. My Master’s journey would have been lonely without all of you!

Finally, this dissertation is dedicated to my loving, supportive and patient parents who allow me to further my study during the times when I should be the one to devote my youth in helping them physically and financially. Thank you for the love, moral and financial support and staying healthy for one year and half when I was away from home. This piece of victory is dedicated to both of you. Last but not least, to my bundles of joy that comes in the form of furry companions, Chengty, Okang, Nakal and Tina, your funny and crazy antics keep me smiling throughout the difficult days of this mind-boggling production of dissertation.
