ACKNOWLEDGEMENT

First and foremost, we would like to express our deepest gratitude to ALLAH S.W.T who makes all things possible and gives us the desire, ability, opportunity and the motivation to complete this proposal on time.

This proposal would not have been possible without the help, advice, cooperation and commitment of various individuals. On top of the list, we would like to express our sincere gratitude and deep appreciation to our supervisor, Miss Jeniway Binti Mohd Jody for her helpful guidance, contribution and encourage. We also would like to thank to Prof Madya Nor Bin Othman as our lecture in teaching us the research methodology and data analysis. The information and knowledge that gained is very valuable to us.

We also wish to extend our thanks to our parents and family for their continuous support, prayers and faith in us too. For my friend who always motivate and support us especially in times of difficulties, thank you.

ABSTRACT

Work stress is now regarded by many commentators as one of the most important issues facing management in this decade. Work stress has the potential to affect the performance of all levels of staff, ranging from senior management to the young and newly employed. Stress can be defined as the body's reaction to a change that requires a physical, mental or emotional adjustment or response. The case study will be specified where it will be conducted in one of the private company, PM CARE SDN BHD, where is located in Subang Selangor. This is the company that provide health and medical services to the clients. This company will provide a link between their clients to any health institution such as private hospital. With the challenging profession that deal with various types of people, stress might be occurs to all level of staff in this company. Therefore, the data and information will be collected from this company and being a sample to study the factor of stress in workplace.
