## Acknowledgement

**Bismillahirrahmanirrahim,**

Alhamdulillah. Thanks to Allah SWT, whom with His willing giving us the opportunity to complete this proposal successfully. Many people have contributed to the creation and completion of this proposal. Firstly, we wish to express our tremendous of appreciation to our supervisor, Ms Nurul Nadia Binti Abu Hassan for her compassion in providing valuable guidance, comments, support and advice along the period of the preparation of this proposal.

We also would like to thank our lecturer who taught on how to do research which is PM Md. Nor bin Othman and Mr. Mohammad Bastyan for ADS511 course - Research Methodology and Data Analysis. We had learned a valuable lesson about research in action.

Furthermore, we also would like to give special thanks to the Ajiya Safety Glass Sdn. Bhd. that have allowed us to conduct our research there. Moreover, we also want to grateful to our family for their warm, continuous encouragement as well as their kind understanding. We wish to send our special thank to our friends, and colleagues for their patience and cooperation during the entire proposal making process.

## **CHAPTER 1**

### **INTRODUCTION**

#### **1.0. Introduction**

This chapter provides the background of study, the problem statement, research objectives and research questions of the study. Moreover, in this chapter the significant and scope of study is also presented. Lastly, at the end of this chapter the definitions of key terms are also provided.

#### **1.1. Background of the Study**

In Malaysia, manufacturing sectors is one of the main contributors in industrial sectors and it contributes 13.3 percent of the total economy in Malaysia. Malaysia as a developing countries and manufacturing sector are the largest components of Malaysia economy and because of that demand from manufacturing sector have been increases due to the effort of Malaysia to be industrialized country by 2020. There is a continuous in today competitive business world for manufacturing process that they want to increases productivity and improve quality but at the same time they want to reduce their cost. Malaysia has high potential in manufacturing sector even Malaysia still has challenges and gets competition from their competitors. According to Leman, Omar and Yusuf (2010), working environment has one of the factors that lead to the workplace accidents in Malaysia.

To understand the factors that can be lead to the workplace accidents in Malaysia, it is important to understand the definition of the manufacturing sector. Manufacturing sector can be defined as the making, altering, blending,
