Acknowledgement

Bismillahirrahmanirrahim.
Alhamdulillah, thanks to Allah S.W.T with all His helps we are able to complete our project paper successfully. Apart from that, we also would like to thank Him for blessing us during our progress in completing this project paper. Without the consent from Him, nothing that we attempt would ever be realized.

First of all, we would like to give special thanks to our supervisor of project paper for Bachelor in Administration Science, Mr. Fajil bin Abdul Batau for all the guidelines and motivation that had been given by her in order to ensure that the project paper results achieved the standards. He gave us guidance; advice, contribution and encouragement which have help us a lot in this project paper.

We would also like to express our appreciation to our friends for all their time and effort to professionally assist us with the information needed. Finally, thanks to our family who have been very supportive and always giving us an inspiration to further complete the project paper. With their support, we always being positive and have a higher commitment to this project paper until the end of it. Thank you.
Abstract

In this study, the researchers focus on the factors influencing aspire to work at UiTM Malacca. The purpose of the study is to examine the relationships between independent variables toward dependent variable. Besides, the researchers also want to examine which independent variables have high significant relationship with the dependent variables. For this study, the researchers use the simple random technique. The total population was 130 respondents and the selected respondents was 98 in UiTM Malacca. Based on Morgan and Krejcie table, the proposed respondents are 97 respondents. The study conducted had used several methods such as reliability test, normality test and the pearson correlation. The finding shows that the most significant factor in influencing women to work is economic condition followed by level of education and family background. Based on the research findings, all the factors have a positive relationship and can influence women aspire to work at UiTM Malacca.
