ATTITUDES AND MOTIVATION TOWARDS LEARNING ENGLISH AS A SECOND LANGUAGE OF REMBAU MARA HIGHER TECHNICAL COLLEGE UNDERGRADUATES

SALWA BINTI OTHMAN

M.Ed (TESL)

AUGUST 2015
DECLARATION

I declare that the work in this dissertation was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the result of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non-academic institution for any degree or qualification.

In the event that my thesis is found to violate the conditions mentioned above, I voluntarily waive the right of conferment of my degree and will be subjected to the disciplinary rules of Universiti Teknologi MARA.

Name of student : Salwa Binti Othman
Student I.D : 2013590041
Programme : M. Ed Teaching English as a Second Language (TESL)
Faculty : Faculty of Education
Dissertation Title : Attitudes and Motivations towards Learning English as a Second Language of MARA Higher Technical College undergraduates.

Signature of Student : [Signature]
Date : August 2015
The writing of a dissertation is never an easy task. Albeit the few hiccups I encountered, I managed to finish this dissertation within the stipulated time due to immense help from kind-hearted people around me.

Hence, I would like to take this opportunity to thank my Academic Project’s supervisor, Dr. Leele Susana Binti Jamian for the guidance, support, and patience that aided me during the entire project. No words could ever portray how thankful I am to have you as my savior.

Not to forget, my deepest gratitude goes to undergraduates and lecturers from Kolej Kemahiran Tinggi MARA, Rembau, for their assistance throughout this study.

To friends and families, my sincerest gratitude sealed with hugs and kisses goes to each and every one of you especially to the matriarch of my heart, Puan Hamidah for the outpouring love and prayers of a loving mother. Also, special appreciation to my sisters, Zakiah and Sabarina for the provision of supports and understanding I received along the way into the completion of this dissertation.

But more than anything, I take this ultimate liberty to thank Allah S.W.T for the given inspirations and ideas upon the completion of this dissertation.

Verily, with every hardship, there is ease.

(Quran 94:6)

Alhamdulillah.
ABSTRACT

Attitudes and motivations have always been investigated among numerous researchers in the area of learning English as a second language learning. This is mainly because they are believed to influence the process of acquiring the second language learning. Hence, this study was carried out with the aims to investigate the attitudes and motivations, and their relationship towards learning English as a second language of Rembau MARA Higher Technical College undergraduates. Generally, a mixed-methods research design consisting of both quantitative and qualitative approaches was employed in order to explore the variables. Stratified random sampling procedure was used to select a total of 130 undergraduates at Rembau Higher Technical College as respondents of the study. The quantitative data was collected using an integrated Attitude and Motivation Test Battery (AMTB) instrumentation developed by Gardner (2004). A set of questionnaire with a six-point Likert scale was used to measure 56 items on attitudes and motivations variables. In addition, qualitative data was collected using six open-ended questions posted to the respondents via the same questionnaire. Findings revealed that firstly, the Rembau MARA Higher Technical College undergraduates had positive attitudes (M = 4.76) and high motivations (M = 4.50) towards learning English as a second language. Secondly, the one-way ANOVA statistical test showed that there was a significant difference of attitudes among undergraduates according to their academic performances at the p <.05 level [F (3, 126) = 6.28, p = .001]. Thirdly, there was a significant difference of motivations among undergraduates according to their academic performances at the p <.05 level [F (3, 126) = 4.15, p = .008]. Fourthly, there was a significant difference of attitudes between the male (M= 4.61) and female (M = 4.97) undergraduates. Fifthly, there was a significant difference of motivations between the male (M = 4.34) and female (M = 4.72) undergraduates. Sixthly, the Pearson product moment correlation coefficient analysis revealed a moderate and positive correlation (r = .74) between attitudes and motivations. Lastly, qualitative findings seemed to triangulate and support the quantitative findings. Majority of the undergraduates agreed that positive attitudes and high motivations tend to influence them to be more enthusiastic and committed in learning English as a second language. Justifications for being positive and negative attitudes and motivations were also recorded from the respondents. In short, all these lead to important implications and recommendations for the future study.
