Date : July 15th 2013

ACKNOWLEDGEMENT

I would like to praise Allah S.W.T for giving me the courage and the knowledge in order to complete my dissertation in time and according on what I want.

Besides that, I also want to say thanks to my parent that always support me in order to finish this dissertation, also to my friends that giving me the indirect support and knowledge that a bit helping me in this dissertation.

I also would like to express my greatest attitude towards my supervisor Sr. Mazlan Bin Abu Bakar that without his support and guidance, I might be not able to finish this dissertation.

Then, I also want to thanks and really appreciate the corporation of the contractor company that had giving me the information about their construction site that's the Johawaki Group, Great Substance Sdn. Bhd, and Kitacon Sdn. Bhd.

ABSTRACT

The construction industry was the industry that had been develop a few years ago and it still in the progress because of our country status as a developing country. Besides that, parallel to the development of the construction industry, there are also the increases of the pollution in the construction due to the human error or the lack of the monitoring by the local authority. The monitoring of the machinery that was used in the construction also need to be considered because the machinery also can be the contributor to the pollution.

The objective of this study was to identify the factor that contribute to the pollution, to identify the regulation and act, and to make the recommendation and conclusion on the issues that had happen around and in the construction site about the pollution. All of this matter will be create through several questionnaire and some observation that will be make at the construction site.
