Acknowledgement

I now wish to acknowledge the tremendous contributions that various institutions and individuals have rendered in order to make this academic dream a reality especially the guidance, support, encouragement and inspiration that I got from my thesis supervisor Sr Mahayudin bin Mahmood. I greatly benefited from our unscheduled routine and your down to earth approach to work. Other lecturers in the Department of Building Surveying in particular were equally helpful. The success of my fieldwork was possible because of the cooperation that given by the Local Authorities and residents. I salute all the institutions and individuals that I may have omitted. Thanks a lot for all every information that given.

Abstract

Increasing population and the problem of improper manner of residents to dump rubbish at improper place and make worsening views especially when residents like to dump rubbish at roadside. The purpose of this study is to know the management of waste dumping at Selangor areas provided by the Local Authorities. A qualitative approach involving interviews, observations and photography were used to gather the necessary primary data, while reference to relevant literature provided me with the much needed secondary data. The information for this study is obtained from the Local Authorities and sampling from a few residents. The study will reveal lack of management for waste dumping from Local Authorities or laziness of residents to dump rubbish at proper place. Illegal dumping domestic waste will be affected to every part of scenery such as when people dump rubbish at river or sea; it will be give bad view to the river.
