ACKNOWLEDGMENT

“In the name of Allah, Most Gracious, Most Merciful”

Praise to Allah: Alhamdulillah, with His bless and for my family to pray for me night and day I am able to complete this project. The project delivered in this paper could not have been accomplished without the help of many individuals.

First and foremost, I would like to express my appreciations and millions of thanks to my project supervisor, Prof. Madya Nursuriati Jamil and project coordinator, Pn. Wan Nor Amalina Wan Hariri for their guides and their numerous invaluable advice, comments, guidance and persistence encouragement throughout the course of this project.

Finally, I am thankful to all people who names are not been mentioned for their encouragement, criticism, and support for this project. I wouldn't have done it without all of you. Thank you. Assalamualaikum.

ABSTRACT

Online Facilities Reservation System (OFRS) is one of the E-Office modules for FTMSK. OFRS refers to entities that provide services for an individual to have access to FTMSK's facilities information via an electronic medium such as Internet, Intranet and direct connection. The facilities reservation module allows the individuals to hire out computer lab, lecture rooms, meeting rooms and/or other facilities. The development of OFRS can improve the efficiency and accuracy of room and equipment processes for FTMSK's academicians. This development used OpenACS web application framework as project development framework and Application Framework Development Process as project methodology. As a result, Online Facilities Reservation System (OFRS) has been developed.
