ABSTRACT

Online shopping is a process in which buy goods or service through the Internet. Nowadays, many online shopping exist in Malaysia such as Lazada.com.my, mudah.my, lelong.my and many more. Since there are too many online shopping website there are still hard to make decision and find the best deals. To overcome this problem, price comparison online shopping website is develop. The purpose of this project for ease the user to online shopping. This project used web scraper to extract each detail of product which are title, image, links, price, and description. Website mudah.my and lazada.com.my are the website to compare the price. User need to enter keyword or name of the item they want and then process extract the detail of item from website mudah.my and lazada.com.my using web scraping then it will combine the output of the process and display the result from both website. A survey has been conducted in order to know opinion from respondent about this project, whether they find this website useful and are they satisfy with this website. Result from a survey shows that respondent find this website is useful and they are satisfy. Therefore, this project might be a help to overcome the problems. For future work, interface can be enhance by classify the item by category.
# TABLE OF CONTENTS

## CONTENTS

| SUPERVISOR’S APPROVAL | ii |
| DECLARATION           | iii |
| ACKNOWLEDGEMENT       | iv |
| ABSTRACT              | v  |
| TABLE OF CONTENTS     | vi |
| LIST OF FIGURES       | ix |
| LIST OF TABLES        | xi |

## CHAPTER ONE: INTRODUCTION

1.1 Introduction  1
1.2 Background of study  1
1.3 Problem Statement  2
1.4 Research Purpose  2
1.5 Objective  2
1.6 Project Scope  2
1.7 Significance of the project  3
1.8 Summary  3

## CHAPTER TWO: LITERATURE REVIEW

2.1 Introduction  4
2.2 Online Shopping  4
   2.2.1 History of online shopping  4
   2.2.2 Advantages of online shopping  6
   2.2.3 Popular online shopping website  7
2.2.4 Problems with online shopping 13
2.3 Information Extraction 14
   2.3.1 Web Scraping 14
   2.3.2 Regular Expression and text gripping matching 16
2.4 Existing System 17
2.5 Application platform 21
2.6 Summary 22

CHAPTER THREE: METHODOLOGY

3.1 Introduction 23
3.2 Project Framework 23
3.3 Details of Project Model 24
   3.3.1 Requirement Planning 24
   3.3.2 Design 25
   3.3.3 Construction 31
   3.3.4 Implementation 37
3.4 Software and Hardware Requirements 37
3.5 Project Timeline 38
3.6 Summary 39

CHAPTER FOUR: RESULTS AND ANALYSIS

4.1 Introduction 40
4.2 Prototype Overview 40
4.3 Future Filtering on the Search Result 42
4.4 Survey Analysis 42

CHAPTER FIVE: CONCLUSION AND FUTURE RESEARCH
