Dissertation Title : Prediction of Business Failure among Malaysian
Construction Companies Using Logistic Regression
Analysis
Signature of Student :
Date : January 2015

ABSTRACT

This study attempts to investigate whether financial ratio analysis derived from financial statements information can be used to give sufficient signal prior to financial distress and/or business failure in the context of Malaysian construction industry. The paper also aims to develop business failure prediction model using logistic regression as a statistical model and financial ratios as independent variables. This study focused on construction industry and thus analyse 14 construction companies consist of seven distressed firms and its healthy counterpart. Data was collected up to five years before the distressed company being declared as PN17. This study employs descriptive and correlation analysis to compare the characteristics of both group and investigates the relationship between financial ratios and financial health of companies. Logistic regression was then utilised in an attempt to develop a model that can predict business failure and the outcome of this study shows that, the model has the ability to predict financial distress of Malaysian construction companies with 71.4% accuracy rate. The findings also reveal the significance of solvency in determining the financial health of a company which supports prior literature in this field. In conclusion, the study provides overview of Malaysian construction industry and might benefit related stakeholder in economic decision making process while considering and analysing financial statements information.

Keywords: Business failure prediction, financial ratio analysis, logistic regression

TABLE OF CONTENTS

AUTHOR'S DECLARATION	ii
ABSTRACT	iii
ACKNOWLEDGEMENT	iv
TABLE OF CONTENTS	v
LIST OF TABLE	ix
LIST OF FIGURE	x

CHAPTER ONE: PREAMBLE

1.0	Introduction	1
1.1	Background Of The Study	1
1.1.1	Construction Industry	2
1.1.2	Business Failure Among Construction Companies	4
1.1.3	Financial Ratio Analysis	5
1.1.4	Prediction of Business Failure	7
1.2	Problem Statement	8
1.3	Objectives and Research Questions	10
1.4	Significance of the Study	13

1.5	Chapter Summary and Organization of the Study	14
-----	---	----

CHAPTER 2: LITERATURE REVIEW

2.0	Introduction	15
2.1	Features of Business Failure Prediction	15
2.1.1	Explanation of Business Failure and Financial Distress Terms	16
2.1.2	Causes And Effects of Business Failure	17
2.1.3	Business Failure Prediction	18
2.1.4	Classification Of Financial Distress Companies Under PN17 Among Public Listed Companies	20
2.2	Financial Statements Analysis To Predict Business Failure	20
2.3	Literature Overview	24
2.4	Limitation of Previous Research	27
2.5	Conceptual Framework	27
2.6	Chapter Summary	29

CHAPTER 3: RESEARCH METHODOLOGY

3.0	Introduction	30
3.1	Research Design	30
3.2	Target Population and Sample Selection	33
3.3	Data Collection Method	35
