AUTHOR'S DECLARATION

I declare that the work in this thesis was carried out in accordance with the regulations of University Teknologi MARA. It is original and is the result of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non-academic institution for any other degree or qualification.

I, hereby, acknowledge that I have been supplied with the Academic Rules and Regulations for the Post Graduate, Universiti Teknologi MARA, regulating the conduct of my study and research.

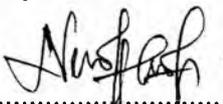

Name of Student : Nurulhuda binti Noordin

Student's ID No. : 2005220843

Programme : Doctor of Philosophy (CS990)

Faculty : Computer and Mathematical Sciences

Thesis Title : Efficiency Factors and Ecosystem Framework in
Malaysian *Halal* Food Certification System

Signature of Student : 

Date : October 2013

ABSTRACT

The *halal* market has grown tremendously due to the Muslims' global demand of *halal* quality on products as prescribed by the *shariah* law. *Halal* is accepted as a quality standard and is applied to product supply and manufacturing encompassing processed food, cosmetics, pharmaceutical and medical products. *Halal* suppliers or manufacturers must abide to the *halal* quality regulation enforced by the public, semi-public and private regulatory bodies offering *halal* certification. These regulatory bodies play an important role within the *halal* supply chain as their operational efficiency may effect the efficiency and the competitiveness of the *halal* industry. This research is conducted to investigate the strategic approach on *halal* quality management to address operational efficiency of the *halal* food certification system using the Malaysian *halal* certification as a case study. The case study comprises of activities that investigate the factors that influence operational efficiency of *halal* certification before proceeding with a detailed and holistic description of the *halal* ecosystem as a strategic approach. A preliminary study that was conducted to gauge the relevancy of this work revealed that the *halal* certification enforcement is plagued with a diversity of issues centered on inefficient work process due to the lack of manpower, scarce use of technology and reliance of manual work process and governance structure that slows down the certification process. Two main studies were further conducted to investigate the perspective of the supply and demand sides of *halal* certification. The first study looks into the supply side where face-to-face interviews were conducted with representatives of *halal* regulatory bodies from the public, semi-public and private regulatory bodies followed by document reviews of the practice. The second study looks into the demand side where face-to-face interviews were conducted with processed food manufacturers to determine issues of *halal* certificate application. A qualitative analysis on each study was done to determine factors that influence the operational efficiency of the *halal* certification process. A further analysis using value chain analysis and work systems method were conducted to produce a new *halal* value chain, a new *halal* work system and a new detailed view of the *halal* ecosystem. From the *halal* ecosystem, a new *halal* governance structure is also carved out. The outcomes of this research contribute to the knowledge on strategic use of information systems where religious view is an important part of the organizational structure.

TABLE OF CONTENTS

AUTHOR'S DECLARATION	ii
ABSTRACT	iii
ACKNOWLEDGEMENTS	iv
TABLE OF CONTENTS	v
LIST OF TABLES	ix
LIST OF FIGURES	xi

CHAPTER ONE: INTRODUCTION

1.1	Overview	1
1.2	Background of the Problem	2
1.2.1	The <i>Halal</i> Food Certification	3
1.2.2	The Malaysian <i>Halal</i> Certification System	6
1.2.3	International <i>Halal</i> Certification	8
1.2.4	<i>Halal</i> Certification Governance	13
1.2.5	<i>Halal</i> Ecosystem	21
1.2.6	Preliminary Study on <i>Halal</i> Certification Process in Malaysia	23
1.3	Problem Statement	27
1.4	Research Questions	28
1.5	Research Objectives	29
1.6	Research Approach	29
1.7	Research Limitations	31
1.8	Research Contributions	31
1.9	Outline of the Thesis	32
1.10	Publications Relating to the Thesis	33

CHAPTER TWO: LITERATURE REVIEW

2.1	Introduction	34
2.2	Ecosystem	34
2.2.1	Overview of Ecosystem	34

2.2.2	Ecosystem Approach	36
2.2.3	Business Ecosystem	39
2.2.4	Mobile Ecosystem	40
2.3	Information System Theories	41
2.3.1	Information System Concepts and Definitions	41
2.3.2	Porter's Five Forces Model	47
2.3.3	Strategies for Competitive Advantage	49
2.3.4	Competitive Advantage and Technology	51
2.3.5	Competitive Advantage and Organisational Structure	51
2.3.6	Value Configurations	51
2.4	Food Quality Systems	59
2.4.1	Food Safety and Quality	59
2.4.2	Hazard Analysis Control Critical Point System	60
2.4.3	<i>Halal</i> Control Point	62
2.5	Previous Studies on <i>Halal</i> Research	63
2.5.1	Supply Chain	63
2.5.2	<i>Halal</i> Value Chain	71
2.5.3	<i>Halal</i> Information System Studies	74
2.6	Conclusion	79
CHAPTER THREE: RESEARCH METHODOLOGY		
3.1	Introduction	80
3.2	The Case	81
3.2.1	Malaysian <i>Halal</i> Food Hub	81
3.2.2	The Malaysian <i>Halal</i> Certification	83
3.2.3	Statistics of <i>Halal</i> Certification	84
3.3	Research Approach	89
3.3.1	Preliminary Investigation	89
3.3.2	Case Study	89
3.3.3	<i>Halal</i> Certification View Development	90
3.3.4	<i>Halal</i> Framework and Verification	90
3.4	Overall Research Methodology	91
3.5	Theoretical Considerations	92
3.5.1	Porter's Value Chain	92
