Programme : Doctor of Philosophy (LG 990)
Faculty : Academy of Language Studies (APB)
Thesis Title : Evaluating and Validating ESP Testing in a Specific Context: Stakeholders’ Perspectives

Signature of Student : ...........................................
Date : March 2016
ABSTRACT

The purpose of this study is to evaluate the validity of an existing English test in order to examine its potential and shortcomings in assessing the engineering students' English ability. The test was built mainly to measure grammar and reading ability, while adopting recognition testing techniques. The focus on the validity event for the ESP reading test arose from the urgent need of the University of Tripoli, Libya as well as students' appeal for an improved English test, where thousands of students from different engineering departments at the faculty of engineering study English (ESL) as a compulsory course and take the ESP test to carry on their academic study at the faculty. The current method of providing the English test to these students presents the university with some problems in terms of test design, construction, content, efficiency, reliability and validity. These are significant aspects for any validation process, and to date, they have not been addressed formally at the university. To achieve this, a framework for validating a reading test (Weir 2005) was adopted throughout the study. The framework is instructive and comprehensive in nature. It has five components and various parameters that ensure meaningful and typical test validity process in all test stages which include a 'priori', during and a 'posteriori' of the test event. The framework was operationalized such that data collection and analysis were conducted according to validity elements of the framework, and consequently all findings were systematically reported. The study involved three phases: a validation study on the Existing English Test (T₁), the development, administration and validation of a Sample Proposed ESP Test (T₂), and the report analysis of the two tests. Data gathered from the main validation study point to deficiencies found in the existing test such as test specifications, test format and content, test construction, rating process, and other administrative and evaluative issues. Through the sample proposed test (T₂) these issues were considered. The comparative validity report of the two ESP tests addressed the question of whether the use of an alternative test fulfills to some extent the requirements of a valid test, and students' needs for academic study and their future career. Recommendations were made for using systematic frameworks, such as that proposed by Weir (2005), to validate and improve language tests in which validity parameters are incorporated and further validation can subsequently be conducted.
# TABLE OF CONTENTS

| CONFIRMATION BY PANEL OF EXAMINERS | ii |
| AUTHOR'S DECLARATIONS | iii |
| ABSTRACT | iv |
| ACKNOWLEDGEMENTS | v |
| TABLE OF CONTENTS | vi |
| LIST OF TABLES | xi |
| LIST OF FIGURES | xvii |
| LIST OF ABBREVIATIONS | xviii |
| DEFFINTIONS OF LINGUISTIC TERMS | xix |

## CHAPTER ONE: INTRODUCTION

1.1 Introduction 1
1.2 Background to the Study 4
1.3 Statement of the Problem 7
1.4 Objectives of the Study 9
1.5 Research Questions 10
1.6 Significance of the Study 11
1.7 The Libyan Context 11
1.8 The Conceptual Framework of the Study 14

## CHAPTER TWO: REVIEW OF LITERATURE

2.1 Introduction 17
2.2 Evaluation and its Importance in Education 17
2.3 Testing and its Dynamic Role as an Educational Measurement 18
   2.3.1 Types of Language Tests 20
   2.3.2 Communicative Competence in Testing 24
