AUTHOR’S DECLARATION

I declare that the work in this thesis/dissertation was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the result of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non-academic institution for any degree or qualification.

I, hereby, acknowledge that I have been supplied with the Academic Rules and Regulations for Post Graduates, Universiti Teknologi MARA, regulating the conduct of my study and research.

Name of Student : Anastasia Binti Harbi
Student I.D. No. : 2010654784
Programme : Master of Science (Finance)
Thesis/Dissertation Title : Dividend Announcement Effects on Malaysian Stock Market Returns
Signature of Student : 
Date : January 2014
This study provides empirical evidence on the effects of unexpected dividend changes (UDC) on stock returns with respect to Malaysian economic conditions namely: (1) before the Asian financial crisis (1990-1996); (2) during the Asian financial crisis (1997-1998); (3) after the Asian financial crisis (1999-2007); (4) during the global financial crisis (2008-2010); and for the (5) overall period (1990-2010). The purpose of this study is to identify the exact economic conditions that stimulate investors’ reactions to changes in dividends and consequently to the stock price movements. Below and Johnson (1996) found that market reactions to dividend changes varies with respect to bullish and bearish markets respectively. The present study therefore believes the dividend signalling effects varies according to economic conditions. This study made 861 observations which consist of 264 dividend increases, 175 dividend decreases and 422 dividend of no-change for the overall period. The findings of the panel data approach reveals that the unexpected dividend changes are positive and significantly correlated with cumulative abnormal returns in the overall period (1990-2010), during the Asian financial crisis (1997-1998) and after the Asian financial crisis (1999-2007). Overall findings constitute support on the dividend signalling theory where an unexpected increase (decrease) in dividends send good (bad) signals to investors leading stock prices to increase (decrease). On the other hand, a cross sectional approach offers similar results only in the period before the Asian financial crisis (1990-1996) and during the Asian financial crisis (1997-1998).

## CHAPTER ONE: INTRODUCTION

1.1 Background of Study 1
1.2 History of FBM KLCI Performance 3
1.3 Country Indices Dividend Yield 5
1.4 Dividend Profile in Malaysia 6
1.5 History of Bursa Malaysia 7
1.6 Problem Statements 7
1.7 Objectives of Study
  1.7.1 General Objectives 9
  1.7.2 Specific Objectives 10
1.8 Limitations of Study 10
1.9 Significance of Study 11
1.10 Organization of the Thesis 15

## CHAPTER TWO: LITERATURE REVIEW

2.1 Overview of chapter 17
2.2 Dividend Signalling Theory 17
2.3 Theoretical Framework 20
2.4 Empirical Findings on Related Studies 22
  2.4.1 The Effects of Changes in Dividend Announcements
2.4.2 The Effects of Changes in Joint Dividend and Earnings Announcements on Stock Returns 25
2.4.3 The Effects of Changes in Dividend Announcement on Stock Returns with Respect to Economic Conditions 26
2.4.4 Determinant Variables of Dividend Changes 26
2.5 Chapter Summary 28

CHAPTER THREE: DATA AND METHODOLOGY
3.1 Overview of chapter 29
3.2 Scope of Study 29
3.3 Empirical Models
3.3.1 Based on Cross-Sectional Analysis on Cumulative Abnormal Returns 31
3.3.2 Based on Panel Data Analysis on Cumulative Abnormal Returns 31
3.4 Measurement of Variables
3.4.1 Measurement of Independent Variable
3.4.1.1 Unexpected Dividend Changes 32
3.4.2 Measurement of Dependent Variable
3.4.2.1 Stock Returns 33
3.5 Hypothesis Testing 36
3.6 Estimation Methods
3.6.1 Cross-Sectional Approach 40
3.6.2 Panel Data Approach 40
3.6.3 Panel Unit Root Test
3.6.3.1 LLC Test 41
3.6.3.2 IPS Test 41
3.6.4 Estimation Procedure for Panel Data Approach
3.6.4.1 Breusch Pagan LM Test 42
3.6.4.2 Hausman Specification Test 43
3.6.5 Panel Data Models
3.6.5.1 Fixed Effects Model (FEM) 44
3.6.5.2 Random Effects Model (REM) 44
