ACKNOWLEDGEMENT

First and foremost, all praise is to Allah, the Almighty, and the Benevolent for his blessings and guidance for giving me the inspiration to embark on this thesis. His utmost blessings have made this entire final semester research possible within the allocated time frame.

I would like to take this opportunity to convey my deepest appreciation towards my Thesis Project's Advisor, Madam Nur Liyana Binti Mohd Yousop for assistance, guidelines and massive input always. I would also like to express my gratitude to my second advisor, Sir Syamsul Bin Samsudin for his continuous support throughout the completion of this Academic Project Requirement for the Bachelor of Business Administration (Hons) Finance.

Next, thanks to parent and family members for always support and encourage us with their best wishes. Last but not least, I would like to thank all the people for their help directly and indirectly to complete my thesis. Without their commitment and dedication, this thesis would not have completed. My thanks to any people especially my classmates have made valuable comment and suggestion on this research which gave me an inspiration to make an improvement on it.

Thank you.

ABSTRACT

Unemployment is an important issue to all countries in developing the economy side. Malaysia is one of the country will face the challenge of unemployment. The general study for this paper aims to investigate the factors that influence unemployment rate in Malaysia. In the economic framework, there is several independent variables that will affect the number of unemployment rate which are Gross Domestic Product (GDP), Population (POP), Inflation rate (INF), and Exchange Rate (ER) towards unemployment rate (UN) in Malaysia. This study was used the time series annual data analysis ranging from 1982 to 2015 which are 34 observations through World Bank Data and Department of Statistic. Then the data were collected before compiled by using E-Views8. The empirical evidence from this research shows that there is a positive and negative coefficient between the independent variables towards dependent variable. Findings from previous research paper mostly may help this research have been complete that give a lot of information to be as references. The result of this paper may make a proper conclusion for the research project paper.
