ACKNOWLEDGEMENT

Alhamdulillah, praise and thank to Allah because of His Almighty and His utmost blessings, I was able to finish this research within the time duration given. Firstly, my special thanks go to my supervisor, Madam Nur Hasni binti Nasrudin and co-supervisor Miss Samsiah binti Ahmad. I am thankful to have both of them for guiding me in completing this project. Their consistent supports and encouragements within two semesters made me able to finish this project. Surely, there are a lot of ups and downs in finishing this project, but with strong motivation, I finally can complete it. Special appreciation also goes to my beloved parents whom never stop to cherish and supports me during my ups and downs. Last but not least, I would like to give my gratitude to my dearest friends whom also contribute toward this project. I am grateful that I have a lot of good friends that always there when I need help. May Allah bless these good people.
ABSTRACT

This mobile application is personally developed for UiTM Tapah students, especially non-resident students in finding off-campus rental housing. Students always complained that they are having difficulties in finding rental housing around the Tapah area. Therefore, this mobile application is developed to help students in finding off-campus rental housing around the Tapah area. This project was split into 6 phases: Planning, Analysis, Design, Implementation, Testing and Evaluation and Documentation. The requirements for this project was gathered through an interview with a staff of the Non-Resident Unit and survey among students. This project is developed based on a preliminary survey conducted among 71 students. Usability testing is applied to evaluate the feedback of students regarding their satisfaction in this mobile application. The result from the survey shows 94.4 % students are satisfied with the overall system. However, there are still some future work needs to be done to improve this project. The future developer can make enhancement of this current application.
