ABSTRACT

The study was conducted in order to find out the significant relationship between the independent variables with the dependent variable. The dependent variable is job satisfaction among employees in an organization. The independent variables in this study are pay and benefits and work environment. The results of the findings were interpreted using Reliability Test, Frequency Distribution, Descriptive Statistics and Pearson’s Correlation Coefficient. The population of the study referred to 285 employees in CTRM AC Sdn. Bhd. From the population, the sample size that had been selected is 164 employees in Value Stream 4 (VS 4) of Quality Control Department. This study sampling design is used probability sampling method which is simple random sampling as the sampling technique.

## CHAPTER 1  INTRODUCTION

1.1 Background of The Study       1  
1.2 Background of The Company     2  
1.3 Problem Statement             4  
1.4 Objectives                    6  
1.5 Research Questions            6  
1.6 Scope of Study                7  
1.7 Significance of the Study     7  
1.8 Limitation of The Study       8  
1.9 Definition of Terms           9
