**Subject: Submission of Project Paper**

Dear Miss,

I had submitted my project paper report title of “PRIMAX Financial Performance” that was required for graduation from the BBA program of UiTM KBM of Business Studies.

By presenting this report, I had tried my best on collecting relevant information about annual report of company based on its’ financial statement, changing its’ new company with annual report PERTONAS and used it to analyze the company’s balance sheet, and income statement using analysis tools from financial statement analysis, and further make recommendation on the company’s improvement based on its’ overall financial performance with the conclusion,

I would be very appreciate with the help of my advisor who guided me on how to write my paper report that was fully required based on my project paper course from UiTM Melaka KBM. I would like to say thank you for all support from my advisor based on my project paper in 6 semester and hopefully that I would graduate during degree study course.

Sincerely Yours,

.....

**MUHD SHAFIQ BIN ISMAIL**

### **Abstract**

This study summarizes the PRIMAX's Group and the Company background, and it carries some issues related to its financial performance such as PRIMAX carries some several financial risks after this company planned to perform its own financial statement. Furthermore, PRIMAX carries out research methodology by using financial analysis tools on the company's balance sheet and income statement. The analysis tools that PRIMAX implement was year to year, index number trend and financial ratio. With these financial analysis tools, it would help us to compare what are the similarities and differences between Group and the Company based on their balance sheet and income statement, and highlighted their own strength and weakness based on their financial ratio. When both Group and the Company identified their own weakness based on its balance sheet and income statement, we should recommend Group and the Company about solution to avoid their weakness. This would help them to solve their financial problem and can perform their financial performance very well in the future. This provides conclusion and recommendation as the end of this chapter after discusses Group and the Company's financial performance using analysis tools based on their result they implement.
