This thesis has not been submitted to any other academic institution or non-academic institution for any degree or qualification.

I, hereby, acknowledge that I have been supplied with the Academic Rules and Regulations for Undergraduate, Universiti Teknologi MARA, regulating the conduct of my study and research.

Name of Student : Nur Atiqah Binti Zainal Abidin
Student I.D. No. : `2015409042
Programme : Bachelor of Business and Administration (Hons) Finance.
Faculty : Business and Management
Thesis : Public Debts And Economic Growth

Signature of Student : 

Date : June 2018
Economic growth (measured by gross domestic product) can be affected both positively and negatively by public debts. The higher the level of public debt, the lower the economic growth of the company. Basically, when a government is having a huge debt, they tend to have a limited spending towards the economic developments. Due to that circumstances, this study was conducted in order to investigate the relationship between the public debts and economic growth in Malaysia. This study was based on secondary data obtained from World Data Bank and DataStream using the time range of 30 years from 1987-2016. The variables used in this study is Gross Domestic Product (GDP) as the proxy to economic growth and a group of public debt elements were used as independent variables. The data were analysed using multiple linear regression to investigate the relationship between the variables. As a result this study finds that the public debt and all the factors are both has positive and negative relationship.
ACKNOWLEDGEMENT

Firstly, Alhamdulillah praise to Allah, the Most Merciful Lord for giving me the opportunity, mental and physical strength and smooth the journey upon completing this research paper. I have gained a lot of knowledge, information and ideas which I can use it in future.

Special thanks to my one and only research advisor and finance coordinator, Puan Nur Liyana binti Mohamed Yousop for her assistance, ideas and knowledge throughout the process of completing this research paper.

I would also express my great appreciation to my friends the time they spent in assisting and guiding me with this research as well as for their endless moral support.

Last but not least, I dedicate this to my beloved parents for their courage of never give up in educate me until I reach my level of study now. Thank you for the endless support and love.

Thank you.
