ABSTRACT

This study examines the determinant of the share prices of the food and beverages company that listed in Bursa Malaysia. Four firms are selected from Bursa Malaysia for analysis with ten years financial data to be participating in this research. These studies are more focused on three companies that have long been established and also active which are Nestle Malaysia Berhad, Dutch Lady Milk Industries Berhad, Ajinomoto Malaysia Berhad and Malayan Flour Mills Bhd

The aim of this paper is to determine the impact of macroeconomics variables towards stock price of company. It is also to examine the main determinants impact on stock price of company. The study employed Panel Data Multiple Regression Model in order to estimate the relationship between macroeconomics variable that selected towards stock price by using Ecometric view (Eview 8.0) software. It was found that significant relationship exists between dividend payout ratio and growth rate as independent variable and stock price as dependent variable. Meanwhile, rate of return is not significant determinant towards share price in Food and Beverages Company in Malaysia.
