ABSTRACT

In Malaysia, the scenario of appreciating and awareness towards heritage conservation was still lacking of support and guidance especially on the colour scheme for historical building. Looking the situation at Jalan Tunku Abdul Rahman with a colourful heritage shop houses and façade treatment decreasing original characteristic whereby every owner insisted to promote their commercial value rather than heritage value. Even though, heritage conservation field is still developing in our country and most of the shophouses is located at rapid development area, the owner and responsible authority failed to use the power of historic value to attract tourist and visitor instead of only thought of economic value. Colour plays an important role whereby a right choice of colour scheme reflected and enhanced the ambience of character and also increased attractiveness. Colour is subjective, but in order to harmonize the area, an analysis should be done to identify suitable colour types for heritage building. Indirectly, it also involves public correspondence to strengthen the relationship with authority and consultant. It is important in a way to conserve our built environment of the place and hope this study will be an inspiration for conservation field to be closed to the community and at the same time can enable to produce a better future for historic building.
ACKNOWLEDGEMENT

Alhamdullilah, gratitude to the Almighty for with His grace and His leave I had to undergo this study.

Millions of thanks to my supervisor, Associate Professor. Nakiah Md Amin, Associate Professor. Salehaton Hussain Sazally and all lecturers of Master of Science Heritage and Conservation Management program for their guidance and instruction provided during the period to complete this study. Further appreciation is given to all AP 777 members and students in the Faculty of Architecture, Planning and Surveying, Arkib Negara, consultants and professionals involves for their cooperation and commitment given to me during my observations and analysis.

Lastly, for my family, father, mother, brothers comrades and friends who have given their views, constructive criticism and encouragement to me. Thanks go to everyone. Indeed all the kindness you all that God are able to reciprocate. Insyallah
