Title

**A Study on Accessibility of Community Facilities at Taman Sri Mas, Taman Sri
Delima, Taman Sri Pendang and Taman Muhibah, Kedah**

Accepted in partial fulfillment of the requirements for a Diploma in Town Regional
Planning

Supervisor: _____ Madam Syarafina Sallehudin

TPS352 Coordinator: _____ Dr. Nor Eda Hj. Ali

Programme Coordinator: _____ Dr. Norainah Abdul Rahman

ACKNOWLEDGEMENT

Firstly, I wish to thank to Allah S.W.T for giving me the chances and opportunity to get involved with this Final Year Project (FYP) in my Diploma and ease my journey to complete my final year session of Diploma. My gratitude thanks to the coordinator of TPS352 planning project paper, Dr. Nor Eda Hji Ali for all of the guidance of this subject and also to the coordinator of Department Town and Regional Planning, Dr. Norainah Abdul Rahman.

My special thanks goes to my subject supervisor, Madam Syarafina Sallehudin for guiding and helping in order to complete this task from the start until the end. Without the supervisors' assistance, I might not be able to complete the whole task of the subject.

Finally, this thesis also dedicated for my parents that always give a big support to me to finish this study from the beginning until now.

ABSTRACT

The inappropriate network and accessibility is a part of a big issue at one place while the community facilities of the neighborhood area is an important place that functional well to the community. Accessibility is a vital instrument to engage people and community from the area and its adjacent. It is also functional to connect people with each other. The problem of accessibility is a compulsory issue that should be managed and planned well. The goal of this research is to implement a successful accessibility concept in a neighborhood. Based on the study area, the neighborhood of Taman Sri Mas, Taman Sri Delima, Taman Sri Pendang and Taman Muhibah shared the same community facilities. This four (4) residential area are united as one (1) neighborhood unit. This research is definitely due to the accessibility of the community facilities for the four (4) residential areas. This research also based on the data that given by the Local Planning Authority (LPA), Majlis Daerah Pendang (MDP). The data collected based on the questionnaire survey and observation method. Hence, the data will be analyzed to identify the potential and constraints of the study area in order to develop a good and well-being strategies to solve the issues.
