## **ABSTRACT**

This study attempts to determine the determinants of stock market performance : a study in Malaysia whether gross domestic product (GDP), unemployment, trading volume and inflation rate have relationship with stock market performance. This study uses 10 years data that is collected from data stream at library UiTM Kota Bharu. The data collected was then tested on the regression analysis and then were use to test the hypothesis in this study. From the regressions that were use in this study, researcher found that all independent variables show a significant relationship with dependent variables.

*Keywords: stock market, GDP, unemployment, trading volume, inflation rate*
