ABSTRACT

Personality Matching Internship Placement System (PMIPS) is web-based systems that have been developed to help computer science student find suitable place for industrial training based on their personality in UiTM Terengganu, Kuala Terengganu Campus. This system assist student to apply to a company that match with student personality and company's personality requirement. Currently, students need to apply manually to find the suitable company without concerning their personality. Due to it, the students are having difficulty to find the suitable company and department to apply for industrial training. This system can be used by three users which are student, coordinator and administration. The methodology used to develop PMIPS is Adapted Waterfall Model. In addition, PMIPS was developed based on Myers Briggs Types Indicator (MBTI) personality theory. The PMIPS was evaluated by the experts and users. The evaluation questions for experts and questionnaire for users consist of six constructs which are ease of use, satisfaction, efficiency, consistency, user interface and usability. Besides that, the questions also distributed to 3 experts and 30 respondents. PMIPS was tested using test plan and evaluated by experts and user. As the results, the highest mean is 4.63(SD=0.49) for efficiency construct. The result shows that it is satisfy to use this system. As for the future enhancement, the system can produce more function such as match with suitable job, career and industry.

TABLE OF CONTENT

CONTENT	PAGE
SUPERVISOR APPROVAL	ii
STUDENT DECLARATION	iii
ACKNOWLEDGEMENT	iv
ABSTRACT	v
TABLE OF CONTENT	vi
LIST OF FIGURE	x
LIST OF TABLE	xii
CHAPTER ONE: INTRODUCTION	1
1.1. Introduction	1
1.2 Process Flow	2
1.3 Problem Statement	3
1.4 Objective	5
1.5 Scope	5
1.6 Significance	6
1.7 Project Framework	6
1.8 Gantt Chart	8
1.9 Conclusion	8
CHAPTER TWO: LITERATURE REVIEW	10
2.1 Introduction	10
2.2 Management Information System (MIS)	11
2.3 Theory of Personality	11
2.3.1 Myers-Briggs Type Indicator (MBTI) theory	12
2.3.2 Holland's Theory	13
2.3.3 Comparison between MBTI theory and Holland's theory	14

2.4	System Development Model	15
2.4.1	Waterfall Model	16
2.4.2	Spiral Model	18
2.4.3	Rapid Application Development (RAD)	19
2.4.4	Prototyping Model	20
2.4.5	V-Shaped Model	21
2.4.6	Comparison of SDM	22
2.5	Previous system	23
2.5.1	16 Personalities	23
2.5.2	CareerTest.net	25
2.5.3	CareerFitter	26
2.5.4	iPersonic	27
2.5.5	MAPP Career Assessment	29
2.6	Implication	30
2.7	Conclusion	31
 CHAPTER THREE: METHODOLOGY		 33
3.1	Introduction	33
3.2	Methodology overview	33
3.3	Planning	35
3.4	Analysis	35
3.4.1	User Requirement	36
3.4.2	System Requirement	36
3.5	Design	37
3.5.1	Process Flow Diagram	37
3.5.2	Context Diagram	38
3.5.3	Data Flow Diagram (DFD)	39
3.5.4	Entity Relationship Diagram (ERD)	40
3.5.5	Functional Hierarchy Diagram (FHD)	41
3.5.6	Database	42
3.5.7	User Interface Design	45
3.6	Hardware and Software Requirement	46
3.6.1	Hardware Requirement	46
3.6.2	Software Requirement	47
3.7	Development	47
3.8.	Testing	47
3.9	Conclusion	52
