ABSTRACT

Most problems in engineering and science field involved finding the solution of an ordinary differential equations. This solution can be obtained exactly by theoretical method or approximately using numerical method. Theoretical method is known to be complicated and required laborious amount of work. Adams-Bashforth method is a numerical method to approximate the solution of differential equation. This method is also known as a multistep method that requires the use of other numerical methods at the first few steps depending on its step. In this research, Adams-Bashforth method in the form of Two-Step, Three-Step, Four-Step, and Five-Step together with Fourth Order Runge-Kutta method are used to estimate the solution of first-order ordinary differential equations. The aim of this research is to compare the efficiency between different version of Adams-Bashforth multistep method in terms of central processing unit (CPU) time and error analysis.

1.0 INTRODUCTION	
1.1 Introduction	1
1.2 Background of Study	1
1.3 Problem Statement	2
1.4 Objectives	3
1.5 Significant of Project	4
1.6 Scope of Project	4
1.7 Project Benefits	5
1.8 Definition of Terms and Concepts	5
1.9 Literature Review	6
1.10 Organization of Report	8

2.0 METHODOLOGY

2.1	Introduction	11
2.2	Research Step	11
2.3	Theoretical Solution of First Order Ordinary Differential Equation	16
2.3.1	First Order of Separable Differential Equations	16
2.3.2	First Order of Linear Differential Equations	17
2.3.3	First Order of Bernoulli's Differential Equations	18
2.4	Numerical Solution of First Order Ordinary Differential Equation	20
2.4.1	Fundamental of Fourth Order Runge-Kutta Method	20
2.4.2	Fundamental of Adams-Bashforth Method	21
2.4.2.1	Fundamental of Adams-Bashforth 2-Step	22
2.4.2.2	Fundamental of Adams-Bashforth 3-Step	22
2.4.2.3	Fundamental of Adams-Bashforth 4-Step	23
2.4.2.4	Fundamental of Adams-Bashforth 5-Step	24
2.5	Conclusion	24

3.0 IMPLEMENTATION

3.1	Introduction	25
3.2	Theoretical Solution of First Order Ordinary Differential Equations	25
3.2.1	Solution of First Order Linear Ordinary Differential Equation	25
