27TH NOVEMBER 2020

ACKNOWLEDGEMENT

First, Alhamdulillah and praise to Allah SWT for giving us the strength and this opportunity to finish up the case study report as this is one of the course assessments in this semester for subject Technology Entrepreneurship (ENT600). In this pandemic situation, it was a bit difficult for us to gather information, however we managed to complete the report with all the support and guidance from surrounding.

For the first one, we would like to give a full heart and thank our lecturer, Madam Yusrina Hayati Nik Muhammad Naziman for the precious advice, guidance, and support. She has always given us tips and shared information from time to time for us to get the idea of this subject. Also, we are very thankful for the examples of ideas and topics from the previous study. It was helpful for us to complete this case study.

Then, we would like to thank the authority of University of Technology MARA and our faculty, Faculty of Computer and Mathematical Sciences of UiTM for allowing us to take this subject and automatically we have some knowledge and basic ideas on the business field. All the knowledge that we gain can be used one day if we choose to be an entrepreneur.

The most important person that we would like to thank is Puan Che Saudah binti Hamzah, the owner of Belacan Madu Enterprise for accepting our request to be interviewed. It was hard for us to find a suitable company to give information about their business. We had a telephone interview, and the time was limited, but she managed to answer the questions.

Lastly, we want to thank all the friends and family especially our parents for supporting us. They have been there giving us help and motivating us from the start.

EXECUTIVE SUMMARY

The case study report is required to analyse the real-life situation in business. Before we proceed to innovation product, we should identify how the company runs a business and find their problems. To do that, we must choose one company and observed by interviewing, document analysing et cetera. So, we are choosing Belacan Madu Enterprise, a food manufacturing product located in Kuala Perlis, Perlis.

We had an interview with the owner, Puan Che Saudah Binti Hamzah to gain more information about her business and company. It was a small company (SME) and we glad to see their business have been operated since 2001. We obtained information such as the process, history background, and their achievements. Besides interviewing, we collect the information through her social media account (Facebook) and internet. They always update their social media account to promote their product. They also have already expanded their product to international such as Singapore. From the interview, we able to collect and identify the strength, weakness, opportunities, and threats of the business using SWOT analysis.

Furthermore, we obtained several problems in business. Most of the problems occurred related to production process, technology machine and the workers' skills. So, form there, we decided on several alternatives that can be used to overcome the problems. One of the main problems can be solved by creating an innovative product. Hence, their company which is Belacan Madu Enterprise can improve their production process and benefits them.
