ACKNOWLEDGEMENT

Alhamdulillah, in the name of Allah the All Mighty, the Most Compassionate, the Most Merciful and the Most Gracious, praise to Allah, the one and only, for giving me patience, strength, knowledge, and ability to complete this thesis.

First and foremost, I would like to thank Prof. Dr. Norlaila Md. Noor because of her guide on the method and the way to do this thesis. I also owe deep thank to my supervisor, Puan Norizan Mat Diah for her guidance, idea, and patience in assisting this thesis from proposal till the completion of the dissertation, and giving me the opportunity to work under her supervision. I also would like to address my special love and appreciation to my beloved mother, fiancée, families and friends for their loving, caring, and supporting that give me strength to learn and acquire knowledge during the period of my study. Without them, I will be able to finish this research.

Lastly, I also would like to thank to all the people involved formally and informally in the development that is not mention above. Thank you.

ABSTRACT

Multimedia presentation is widely accepted as a successful learning aid that proved to enhance the interest and the skill of the targeted audience. With the interactive features found in the presentation, the multimedia learning approach has widely been accepted all around the world. Learning songs also are now available in the multimedia presentation. As for children songs, the nursery song is also available in the multimedia compact disc format. Kids Multimedia Interactive Songs or K-MIS is develop specifically for children from age 4 years to 6 years. The content of the courseware is Malay children songs. In developing the courseware, methodology that consists of planning, analysis, design, development and refinement phase is used. The data is collected through observation on several nursery center and interviews with one of the nursery center teacher. K-MIS courseware is develop in an interactive form that allows the children to participate in the learning process. The user can decide what type of song and stories they want. This courseware emphasize on the usage of Malay language as a delivering platform in order to enhance the skill of mastering our national language and to popularize again our tradition culture in term of Malay children sons.
