Lightweight Concrete Green Wall Panels

### Innovation Idea:

Coarse aggregate is one of the materials used in the concrete mixture to produce a strong concrete structure. Nevertheless, the use of the material has resulted to environmental problems. Lightweight Concrete Green Wall Panels is a product that can address issues in the ceramic industry and help alleviate environmental concerns in forests due to excessive aggregate quarrying. This research aims to develop a Lightweight Concrete Green Wall Panels by using crushed clay pottery to reduce the amount of waste in Malaysia. Data were collected through document review, design thinking, experimental approach, and secondary data analysis. The data was analysed using graphical representations from Excel software and by calculating the mean, average, and standard deviation of the specimens. Four types of concrete were prepared to produce the suitable concrete mixture including normal, 10%, 20%, and 30% of recycled crushed clay as a substitute for the coarse aggregate to produce the lightweight concrete. Based on the result in terms of compressive strength, tensile strength, density, and water absorption tests, a replacement rate of 30% was selected to assemble the prototype of the Lightweight Concrete Green Wall Panels. The marketability of the product was assessed based on previous research on the usage of green walls in Malaysia. One limitation of this research is that only concrete mixture characteristics were tested, while the effectiveness of the green wall was not assessed due to inadequate testing instruments. However, with the implementation of lightweight green wall panels, it could bring significant benefits in terms of climate change, land conservation, and the health and well-being of users. Thus, further research and experimentation could involve using a higher percentage of recycled crushed clay and testing the effectiveness of green wall for users.

Prof. Madya Dr. Nur Hisham Ibrahim  
Rektor  
Universiti Teknologi MARA  
Cawangan Perak

Tuan,

**PERMOHONAN KELULUSAN MEMUAT NAIK PENERBITAN UiTM CAWANGAN PERAK  
MELALUI REPOSITORI INSTITUSI UiTM (IR)**

Perkara di atas adalah dirujuk.

2. Adalah dimaklumkan bahawa pihak kami ingin memohon kelulusan tuan untuk mengimbas (*digitize*) dan memuat naik semua jenis penerbitan di bawah UiTM Cawangan Perak melalui Repositori Institusi UiTM, PTAR.
3. Tujuan permohonan ini adalah bagi membolehkan akses yang lebih meluas oleh pengguna perpustakaan terhadap semua maklumat yang terkandung di dalam penerbitan melalui laman Web PTAR UiTM Cawangan Perak.

Kelulusan daripada pihak tuan dalam perkara ini amat dihargai.

Sekian, terima kasih.

**"BERKHIDMAT UNTUK NEGARA"**

Saya yang menjalankan amanah,

*Setuju.*

*27.1.2023*
