## Acknowledgement

By completing this research was a challenging task for us. However, we had gain many help of other parties who have made this task a success.

First of all, we would like to thank to our supervisor, Sir Rahezzal for giving us an opportunity to complete this assignment and for leading us toward this research journey. A token of thankful also toward our family and friends for the support and encouragement given throughout the journey of the research. In order to complete this research, it is one of the most challenging journey for both of us as it is still something new knowledge for us. But yet, it helps us to be more develop and knowledgeable in handling a research proposal.

A token of appreciation also to the University Malaysia Sabah's students and UiTM Sabah's students who had become our research respondent and help us in collecting data for our research assignment.

Fatin Dalilah Binti Emran,

Siti Nurul Hamizah Binti Masani,

AM228, Bachelor of Administrative Science,

UiTM campus Sabah.

Other than that, this examination additionally refers to the understudies' students. According to Park (2000), stated that it is essential to comprehend the desire for understudies in term of how they might want to live and which highlight of the convenience they respect critical for their housing fulfillment. It is important for the students to have their own preferences on the surrounding of the residential place including facilities that been provided, security system in the residential area that will create a positive atmosphere of living and the desire for students selecting their preferable residential area.

## INTRODUCTION

### 1.1 Introduction

In this topic, it focuses toward background of this study. The research is entitled on “student personal preference living between inside or outside campus” to determine the residence’s satisfaction that most prefer by the students. The research finding that there are several numbers of student’s entry at their selected institutions are more develop and comfortable than the accommodation of students.

The living preferences of students are mostly influenced by some factors such as such as housing preferences, student background, and student preferences. The living preferences also need to be correspond with the other aspect such as hostel’s quality, cost, location, and hostels facilities. Students living preference is one of the important role to contribute the student to gain more influence in term of their growth, behavior and study performance. The different type of preferences implement for university, also the role of certain university to focus on factors that able to gain student’s interest in hostel area. The research objective in research fulfillment of university students with inside campus or outside campus convenience with an accentuation on the ethnicity of the understudies, the estimation in understudy fulfillment on different offices given on instructive foundation include settlement that can be valuable in helping them to comprehend their territories of qualities and distinguish conceivable zones for upgrades.

Other than that, this examination additionally refers to the understudies’ students. According to Park (2006), stated that it is essential to comprehend the desire for understudies in term of how they might want to live and which highlight of the convenience they respect critical for their housing fulfillment. It is important for the students to have their own preferences on the surrounding of the residential place including facilities that been provided, security system in the residential area that will create a positive atmosphere of living and the desire for students selecting their preferable residential area.
