# CHAPTER ONE

## INTRODUCTION

This chapter provides the background of the study, details of the significant of moral values to youngsters, the issues and problem from research and article that led to this research.

### 1.1 Background of Study

A moral value is a good deed in order to distinct between right or wrong behavior. According to oxford dictionary, moral values can be defined as human concerned with the principles of right and wrong behavior. It also can be defined as standards of behavior principles of right and wrong.

People around the world, regard of their religion, belief and race, moral values play a major role to protect our nature as human. For example, Malaysia draws on the varied cultures of the different people of Malaysia. Even though Malaysia have different race and belief, but all religion in Malaysia agree that moral values it a good deeds that can bring benefit to them in daily live.

Nowadays, youngsters in Malaysia lack of practice of moral values. It is because there is lack of disclosure to this value. They need to know this value and in order to prevent this value from vanished. With advanced technology, this information can be delivering and attract youngster to learn and that can educate moral values not only to youngster but tourist that visit Malaysia.

Based on preliminary study on existing application, there are a few application can be used as guideline in term of design and content. This is some of examples related to moral values applications.
