## ACKNOWLEDGMENT

*“In the name of Allah, the most Gracious and the most Merciful”*

Alhamdulillah, praise be to Allah for providing me His ʼalmighty blessings to complete the project. Without His help, mercy and facility it would be impossible for me to complete this project.

I’m deeply grateful to my supervisor, Dr Norlela Samsudin for her concern, guidance, patience and relentless support even with all the trouble I faced throughout the two semesters she supervised me. I consider myself very fortunate for being able to work with a very encouraging supervisor such as her from the beginning of the journey of this final year project up to the completion of this report.

I’m indebted to my CSP650 lecturer, Puan Dr. Hasiah Mohamed @ Omar for teaching and approving the proposal to continue developing this project and also all of the lecturers that helped me throughout my study in UiTM.

Special appreciation goes to my mother, Azizah Binti Ibrahim and my father, Suhaimi Bin Junoh for the continuous moral support and Du’a throughout all my studies. Finally, I am thankful to have CS2246A as my classmates who supported me in any respect during the completion of this project.

Thank you and may Allah bless all of them.

## ABSTRACT

Education system changes from time to time. Nowadays it is changing from the traditional way of teaching to more interesting method. One of these methods is interactive learning It helps people to more understand the lesson that is being taught through a multimedia system. Nevertheless, the current education materials such as books and magazines are not effective for teaching and learning languages such as the Arabic Language. Learning a language requires learners to pronounce the words correctly and it a problem when using text materials such as text book. Therefore, this courseware is developed to help the learners learning Arabic Language. Arabic Courseware to Understand Al-Quran (QCA) is to help Malaysian to understand meaning of verses in *solat* by teaching them the Arabic grammar. In addition, student can learn Arab language and will improve their understanding. Besides that, this courseware can help the students more understand the content provide to them because it consist element of graphical, text, audio, video and animation. The (UCD) integrated with ADDIE model was chosen as model for this project. Therefore, this courseware has been developed to enhance the existing application and teach them more using interactive method. The evaluation of the courseware is conducted based on the construct of questionnaire that was given to 30 respondents. From the analysis, almost third of four respondents satisfied in term of user interface, content, usability of the courseware, icon use and easy of learning. Therefore hopefully through this research in the future, it will provide children with a more interesting multimedia system and eventually inspire them to learn.

### **CHAPTER ONE: INTRODUCTION**

1.1 Introduction	1
1.2 Problem Statement	2
1.3 Project Objectives	3
1.4 Scope	4
1.5 Project Significance	5
1.6 Research Framework	6
1.7 Gantt Chart	8
1.8 Summary	9

## **CHAPTER TWO: LITERATURE REVIEW**

2.1	Introduction	10
2.2	Criteria For Good Courseware	11
2.3	Courseware Development	14
2.3.1	ADDIE	14
2.3.2	ADDIE with User Centered Design (UCD)	15
2.4	Existing Courseware	18
2.4.1	Madinah Arabic	18
2.4.2	Learn Arabic Education	19
2.5	Implication Of Literature To Project Development	20
2.6	Summary	21

## **CHAPTER THREE: RESEARCH METHODOLOGY**

3.1	Introduction	22
3.2	Research Methodology	22
3.2.1	Preliminary Study	24
3.2.2	Analysis	24
3.2.3	Design Integrated with UCD	26
3.2.4	Development	30
3.2.5	Evaluation	31
3.2.6	Documentation	33
3.3	Summary	33
