ACKNOWLEDGEMENTS

First and foremost my prayer and glory be to Allah SWT, The Most Gracious and Most Merciful, for given me the strength and ability towards the completion of this report entitled " Lianas of UiTM Forest Reserve".

In the process of completing this final project, my gratitude goes to various people who in one way or another helped in making this project successful. My appreciation goes to my advisor, Tuan Shaikh Abdul Karim Yamani Bin Zakaria for being patience in his advice, constructive criticisms and comments.

A lot of thanks also mentioned to my classmates, who involved directly or indirectly, thanking them for their help and support.

Last but not least, I would like to convey my deepest gratitude and special thanks to my beloved parents for their patience, support, advice and constant prayer when I needed most at time of hardship which finally lead to success.

Abstract

LIANAS IN UiTM FOREST RESERVE

By

Suhaini Ali

April 2000

The Reserve Forest of Universiti Teknologi MARA Pahang, became as protected forest which was gazetted for the Universiti Teknologi MARA students. The various species in this lowland Forest Reserve was been caught attention by a group of student from Diploma In Wood Industry, Universiti Teknologi MARA Pahang for their final project. The final project is about Lianas or woody climbers' families and their commercial value. The survey plot is about 50m x 50m with the percentage of it 0.05 % from the whole areas of Universiti Teknologi MARA Forest Reserve. There are more then six species or families of Lianas was found in Universiti Teknologi MARA Pahang Forest Reserve of Line 11 from our survey data.
