ACKNOWLEDGEMENT

Assalamualaikum w.b.t...

Firstly I would like to take opportunity to shows my thankfulness towards Allah S.W.T for rendering upon me such tremendous moments with determination and courage the period of time leading to the completion of this project.

Besides that, I am pleased to express my great appreciation to my project advisor also my tutor Prof. Madya Abd Jalil Bin Ahmad, due to the encouragement on the advices, comments and suggestion, which had expanded the valuable information during the preparation of this project.

Lastly, sincere gratitude to my beloved family and my friends who give me the encouragement to keep up with the study and encourage leading towards the success of this final project. Once again, I want wish thank you very much to all people who involve in this project whether direct or indirect.

Thank you very much....

**THE EFFECTS AND POLLUTION CONTROL OF
WOOD PRESERVATION CHEMICALS**

ABSTRACT

This review is to survey the effects and pollution control of wood preservation chemicals. Generally, the purposes of wood preservation are to preserve the structural integrity and extend the lifetime of wood. But its use may be able to bring effects to public health and environment especially if the treated wood is not properly used and handled. However, the effects and pollution of wood preservation chemicals will be prevented when suitable and effective steps were taken.
