ABSTRACT

HONEYCOMBLEXION SHELVE

This final year project aims to produce honeycomblexion shelve using raw material that is pine wood. The objective of this project is to come out with a new design that can save space using wood pine and produce low cost furniture and commercialized it into the market. The shelve is in honeycomb design and it is quite rare in terms of shape. After the design process using software, a survey was undertaken in evaluating customer satisfaction on the characteristics of the product suing Google Form. A set of questionnaires was distributed to 101 respondents of different gender, age, income and profession. The characteristics evaluated by the respondents include material, , attractive, aesthetic, commercialization and price. Based on the data analysis mean for commercialize is the highest that is 4.72 so it proves that it is suitable for commercialize it in the market one day.

ACKNOWLEDGEMENTS

First and foremost, I would deliver my gratitude to Allah for whom with HIS willing gives me the most precious opportunity to complete this thesis and also for giving me the strength of mind to handle all the obstacles and difficulties in finishing this task properly especially in online distances learning (ODL) because of pandemic Covid-19. A special thanks to my dedicated supervisor, Madam Nurrohana bt Ahmad who has given the guidance and my needed to complete the research study. She inspires me greatly to work on this final year project. Besides that, I would like to Dr. Siti Zalifah for her guidance in completing this final year project. I am also blessed with having very dear friends that are Farah Haslinda, Shabiq, Anis, Aisyah and others who assist to find the sources in writing the proposal. Furthermore, thank you to my parents and family as financial supporter, for their hope and blessed, for their constant support, motivation and encourage to complete this final year project. Lastly, a special thank you to all respondent that have answer my Google Form and sharing their knowledge, ideas and support for this final year project.

Nor Hidayah binti Ahmad Fuaad
