

WOOD WASTE MANAGEMENT IN MALAYSIA

BY

MURNIZA BINTI OMAR

**Final Project Paper Submitted in Partial Fulfillment for the Diploma in
Wood Industry, Faculty of Applied Sciences,
Universiti Teknologi Mara**

OCTOBER 2004

ACKNOWLEDGEMENT

Alhamdulillah, gratitude to Almighty for giving me strength and opportunity to finish and complete my final project paper. Here, I would like to express my special appreciation to my advisor, Mr. Megat Ahmad Kamal Megat Hanafiah for his encouragement and guidance in designing and implementing this project.

Sincere thanks also due to Mr. Wan Mohd Nazri Wan Abdul Rahman, Program Head of Diploma in Wood Industry, UiTM Pahang, and Assoc. Prof. Abdul Jalil Ahmad for kindly extending all facilities, guidance and cooperation given during the course of study.

A lot of thanks to my entire lecture and staff of Wood Industry that had given me so much support and led us to what we wanted to learn since I, semester one until now. They always encourage my friend and I to gain the knowledge from this program of Diploma Wood Industry.

MANAGEMENT OF WOOD WASTE IN MALAYSIA

By

Murniza Binti Omar

October 2004

ABSTRACT

In this decade, there was many activities were contribute environment pollution. The pollution causes by waste material and picking left from the activities was done for develop Malaysia infrastructures. The activities are important as an alternative to help develop of Malaysia. Without it, Malaysia economies will not stability. Like other activities, wood processing industries also contribute some pollution or wood waste for environment. Whatever the activities is, there must have some pollution. Wasting must happen on wood processing activities. The example of manage the wood waste will hopefully help the other activities to become less their pollution. The sources of wood waste in Malaysia are always from waste of factories, forest logging and also from plantation. All these are under the ministry of Environment and Forestry Department.
