ACKNOWLEDGEMENT

My sincere gratitude first and foremost goes to Allah, Alhamdulillah all praises to Allah for the strengths and His blessings to me through all my life and studies. Seconds, special thanks go to my lecturer Mrs Roseziahazni Binti Abdul Ghani as my first advisor and Dr Zuryati Binti Ahmad as my examiner for providing unlimited guidance throughout the study up to the point of submission.

Next, I would like to say my gratitude to my beloved family who had always been supporting me through my studies. Without their help and support, I would not even be here to carry out my studies. Moreover, I thank all the people who in one way or the other helped me and positively contributed towards the completion of this research project.

In addition, I hope my writing in about determinants of profitability a study of listed consumer products and services companies in Malaysia can contribute some information and input on how important of the financial management.

3.9.4 Multicollinearity Test.....	22
3.9.5 Heteroscedascity Test	22
3.9.6 Panel Data Analysis.....	22
3.9.7 Random Effect Model Analysis (REM).....	23
3.9.8 Breush Pagan and Langragian Multiplier.....	23
3.9.9 Fixed Effect Model Analysis (FEM).....	23
3.9.10 Hausman Fixed Test.....	24
3.9.11 Coefficient of Determination (R-Square)	24
3.9.12 T- Statistics.....	24
CHAPTER 4: DATA ANALYSIS AND INTERPRETATION	25
4.0 Introduction.....	25
4.1 Descriptive Statistics	25
4.2 Pearson Correlation	27
4.3 Pooled Ordinary Least Square (Pols) Regression	28
4.4 Multicollinearity Test.....	29
4.5 Heteroscedasticity Test	29
4.6 Random Effect Model (REM).....	30
4.7 Breusch Pagan (BP) and Langragian Multiplier (LM) Test	30

ABSTRACT

A number of selected firm factors have been studied by many researchers and academicians to understand the determinants of firm profitability. The purpose of this study is to investigate the relationship between selected companies' factors affect profitability of listed consumer products and services companies at Bursa Malaysia. The regression of analysis is based on the Pooled Ordinary Least Square Method (POLS) comprising 200 observations of 20 consumer products and services companies from the period 2008 to 2017 in order to determine the firm factors of liquidity (current ratio), firm age (FA), growth (G), and firm size (FS) with the return on asset (ROA) of listed consumer products and services company profitability in Malaysia. The study incorporates 20 companies that involving with Shariah compliant activities. The study evidenced that the only variables that were statistically significant were liquidity and firm age and the other two variables that were not statistically significant were namely growth and firm size. Though firm size and liquidity were positively related to firm profitability and growth and firm age was the only variables that was negatively related to firm profitability. The study recommends to the management to focus efforts on those variables that positively affect their long run profitability.
