ACKNOWLEDGEMENT

My special thanks to Allah S.W.T. for His blessing and strength rendered to me to complete my final project entitle “ The Properties of Oil Palm Sawn Timber in Furniture Making” and also to my beloved friends for their support.

I would also like to offer my special thanks to my advisor, Puan Norhafizah Bt Rosman, Associate Professor Dr. Jamaludin Kasim and Puan Norruhanna Ahmad for helping me at every phase of the study. Who are so generous in lending me helping hands and showing me the correct ways of performing my task.

I also would like to extend my appreciation to those who are involved either directly or indirectly in completing this project. I believed, without their helps, I would not be able to finish this final project.

October 2007

ABSTRACT

Malaysia has a great potential in turning its abundant supply of oil palm into a furniture making. Lately, the sawn timber is shortened in Malaysia in furniture industry. Malaysia only provided rubber wood and acacia trees as a source of sawn timber furniture. Now other new alternative that being used is non wood resource such as palm oil that will replaced rubber wood and acacia trees as a new source of furniture making sawn timber. However, oil palm is still subject to studies to know the properties oil palm sawn timber either it can be as a raw material or not in furniture making.
