ACKNOWLEDGEMENT

Assalammualaikum W.B.T,

First of all, I would like to take this opportunity to gratefully thank Allah The Almighty for His blessings, upon giving me a good health and time to complete this research project within the time given.

Next, I wish to express my profound gratitude to my supervisor, Mdm. Sarmila Udin for devoting her time to supervise this project paper. Her splendid academic judgement, firmness and diligence were enormous assistance in bringing this study up to its standard. I would like to express my utmost appreciation to Mr. Shamlie Salisi for his guidance and constructive comments in completing this research.

Sincere admiration and a very special thanks goes to my mother, my family and friends for giving me the encouragement, support and motivation to get this project paper done properly.

Lastly, I would like to thank Universiti Teknologi MARA for giving me the opportunity and allowing me to use the facilities provided by the university.

Thank you.

CHAPTER 1 INTRODUCTION

1.0	Introduction	1
1.1	Background of study	1-3
1.2	Problem statement	4-5
1.3	Research objective	6
1.4	Scope of study	6
1.5	Limitations of study	7
	1.5.1 Availability and accessibility of information data	7
	1.5.2 Skills and expertise	7
	1.5.3 Focusing data	7
1.6	Significance of study	8
	1.6.1 For researcher	8
	1.6.2 For future	8
	1.6.3 For financial interest party	8
1.7	Organization of study	9-10
1.8	Definition of terms	11

1.8.1	Stock returns	11
1.8.2	Firm size	11
1.8.3	Book-to-market equity	11
1.8.4	Gross domestic product	11
1.8.5	Inflation	12

CHAPTER 2 LITERATURE REVIEW

2.0	Introduction	13
2.1	Stock Return	14-16
2.2	Theory of Study	17
2.2.1	Arbitrage Pricing Theory	17-18
2.3	Firm Specific Variables	19
2.3.1	Firm Size	19-20
2.3.2	Book-to-market Equity	20-21
2.4	Economic Variables	22
2.4.1	Gross Domestic Product	22-23
2.4.2	Inflation Rate	23-24
2.5	Theoretical Framework	25
2.6	Summary of Chapter	26

CHAPTER 3 DATA AND METHODOLOGY

3.0	Introduction	27
3.1	Research Design	27
3.2	Data Collection	28
3.2.1	Sampling Technique	28
3.3	Variables and Measurement	29
3.3.1	Dependent Variables	29
3.3.1.1	Stock Return	29
3.3.2	Independent Variables	29

ABSTRACT

This paper attempts to investigate the relationship between firm specific variables and stock returns. This research also sought to investigate the effect of economic variables on stock returns in Malaysia. Four variables are used as control variables in explaining the stock returns, namely firm size, book-to-market equity, gross domestic product (GDP) and interest rate. This study which covers the period of 2011 until 2015 comprised 30 selected companies listed in Malaysian stock market. The general findings reveal that book-to-market equity has a significant relationship with stock returns and GDP and inflation rate have a significant effect towards stock returns in construction, consumer production and manufacturing industries.
