## **ACKNOWLEDGEMENTS**

Praise to Allah s.w.t for giving me the strength to get through the course of Bachelor of Finance Programmed to complete this project paper.

First and foremost, I would like to express my sincere gratitude to my advisor Sir Mohd Shamlie Salisi for his continuous support, for his patience, motivation and immense knowledge toward me to complete this project paper. Besides, his guidance helped me in all the time of research and writing of this project paper. I could not have imagined having a better advisor to supervise me.

A lot of thanks also to my classmates and other friends in helping me direct or indirectly in term of giving any idea or guidance of what I have been researching in my paper. I would like to give my biggest gratitude to Madam Noor Hafizah Binti Narusin (Head of acquisition department) for the encouragement, cooperation and support during my practical training in the Institute starting from 1<sup>st</sup> August 2016 until 2<sup>nd</sup> December 2016.

Last but not least, a special gratitude deepest from my heart goes to my family members also, especially my father and my mother for their support, encouragement and advises throughout completing this thesis paper.

## **ABSTRACT**

This study explores the effectiveness of delta hedging strategies toward Malaysian Foreign Exchange Market. Malaysian Foreign Exchange Markets actually were traded one of the options strategy which is the hedging strategies but there were no test had been conducting this delta hedging strategies toward the risk and return foreign exchange market in Malaysian country. The dummies method were developed which is Sharpe Ratio replaced the adjusted measurement, Treynor Ratio replaced volatility variance and Jensen Alpha replaced the level of volatility. By using the CAPM method to predicting the risk and return in Foreign Exchange Markets. There were three groups of asset classes which are equity group, fixed income group and balanced group. The methodology of this research paper will analysis one of the group of asset classes has the lowest risk and return toward the foreign exchange market itself.

Keywords: Delta hedging strategies, Malaysian foreign exchange market, Risk adjusted measure, Volatility variance, Level of volatility, CAPM, equity group, fixed income group, balanced group.
