CSI153: CLINICAL PARASITOLOGY

Course Name (English)	CLINICAL PARASITOLOGY <b>APPROVED</b>													
Course Code	CSI153													
MQF Credit	3													
Course Description	This course is designed especially for students in the health science fields, especially in the area of clinical laboratory science (medical laboratory technicians). It presents basic descriptions of parasites commonly found to cause human disease. This course provide the clear, concise, practical, and clinically relevant information necessary to gain an understanding of the pathogenesis of parasitic infections and to be able to diagnose these infections in the laboratory with the emphasis will be on techniques to recover parasitic structures and identification of diagnostic stages.													
Transferable Skills	Knowledge and motor skill development													
Teaching Methodologies	Lectures, Blended Learning, Lab Work, Field Trip													
CLO	CLO1 Describe the significant phylum of medical parasites for humans and the basic characteristics of protozoan and helminths parasites involved in human infection. CLO2 Demonstrate the collection and processing procedures of fecal and other specimens for parasites identification. CLO3 Differentiate various diagnostic methods for distinct specimens of parasites' emergence and quality control and prevention measures of parasitic infection in humans.													
Pre-Requisite Courses	No course recommendations
